BUSINESS TERMS

We Especially Invite Charge Accounts. A charge account is more convenient than to remit for each order at the time it is sent us, you pay no more for your goods by reason of this accommodation. As to our responsibility, we refer you to Dun's or Bradstreet's Mercantile Agency or any bank or trust company.

When sending your first charge order, if possible, send us the name and address of someone with whom you already have a charge account. This saves time.

REGARDS C. O. D. SHIPMENTS

Goods can be sent C. O. D. (with the exception of perishable items, which include plants and cold-storage bulbs; these cannot be sent C. O. D.). No C. O. D. shipments for any kind of goods can be made by express or freight out of town unless a partial remittance accompanies the order. No C. O. D. orders delivered where the amount is less than 50c., except in the following zone in Philadelphia: Market Street Ferry, to Sixteenth Street, Pine Street, to Vine Street. C. O. D. orders outside of this zone in our delivery limits must amount to \$1.00 or more. During April no orders C. O. D. in their entirety can be accepted.

SHIPPING INSTRUCTIONS

Always state by what method you want goods forwarded, otherwise we will ship according to our best judgment.

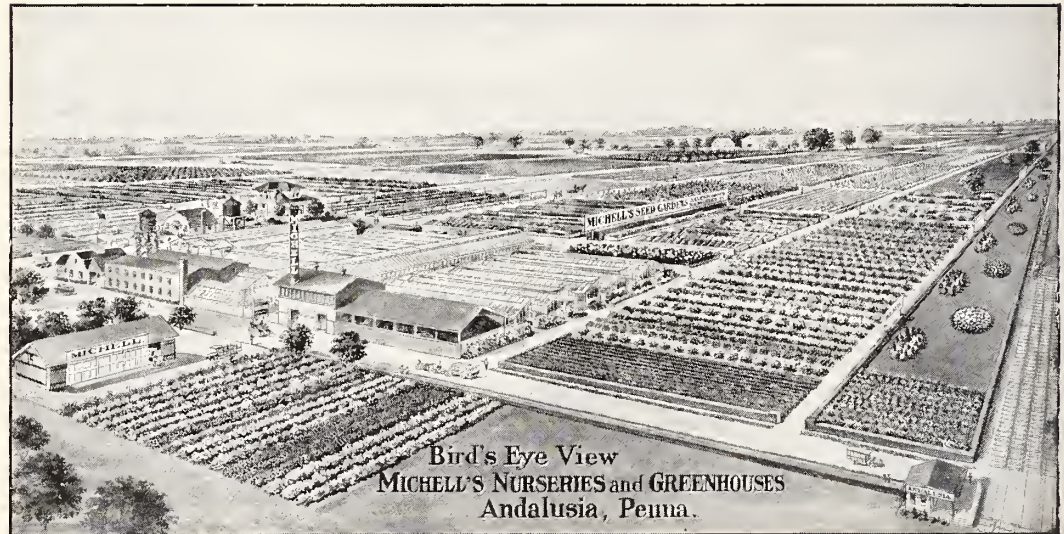

PACKING CHARGES

No charge is made for boxes, packing or bags, except for two-bushel seamless sacks, which are returnable for credit at the market price as charged.

PARCEL POST SHIPMENT AT OUR EXPENSE AS FOLLOWS

We pay postage charges on all orders for vegetable and flower seeds, provided the order calls for packets, ounces, quarter-pounds and pounds (beans, corn, peas and mixed grass seeds, bulbs, plants and sundries are **not** included). If these are wanted by mail, remit for postage according to rate of postage from Philadelphia to your post office.

Parcels Post weight limits are 70 lbs. in 1st, 2d and 3d zone; in all other zones 50 lbs.

MICHELL'S SUPERB NAMED HYACINTHS

A Spring flower-effect in the Italian gardens of the late Mr. P. A. B. Widener, "Lynnewood Hall," Ogontz, Pa., planted with Michell's Bulbs

CULTURAL DIRECTIONS ON HYACINTHS—For **Outdoors** plant October and November in soil composed of 1-3 sand, 1-3 cow or sheep manure, and 1-3 good garden soil. After the ground has frozen, cover with litter, leaves or coarse manure.

For **Pots** use same soil as directed above and plant any time from September to November. After planting, water well and then bury the pots outdoors to the depth of 6 inches for eight weeks. After this remove to a cool room.

For **Glasses** the single varieties are the best. Place the bulb in a glass, which should be filled with water, so it touches the bottom of the bulb and place the glasses in a cool, dark place. Change the water occasionally. Keep in the dark about 8 weeks, and then remove to a light, cool place.

To assist customers in selecting varieties, that will bloom at the same time, we have affixed the letters E, M and L, signifying E for early sorts, M for midseason, L for late sorts.

NAMED EXHIBITION HYACINTHS

Every year we have our most reliable grower make us a selection of the largest possible Hyacinth Bulbs to be obtained. He usually scours the entire bulb-growing district of Holland to find them. In past years they've been so sought after that we rarely have enough to meet demands; so order early. We offer them in single varieties only, our selection. Price, 30c. each; doz., \$3.00; \$20.00 per 100.

MICHELL'S SUPERB HYACINTHS (Continued) 3

CHOICE BEDDING HYACINTHS (Unnamed)

Michell's Bedding Hyacinths are larger than those put in ordinary mixtures. They will produce fine spikes and therefore can also be used for forcing purposes. Where bedding of Hyacinths is to be done in large quantity we can particularly recommend them on account of their low cost, the length of time they remain in flower, and because of their handsome effect. Parcel Post weight, 2 lbs., per dozen; per 100, 12 lbs.

Dutch Roman or Pan Hyacinths

Michell's Monster White Roman Hyacinths

FRENCH ROMAN HYACINTHS

French Roman Hyacinths afford a continuous supply of bloom from early winter until late in spring if planted in succession (two weeks apart). They are very fragrant.

They are easily grown in pots or pans. The bulbs, if potted in August or September, the pots plunged in the open ground for a month, until the bulbs are well rooted, and then brought in the house, they can be had in flower in November or December, and a continuous supply of these delightful flowers may be had, by bringing in a few pots or pans of the rooted bulbs at intervals of about 2 weeks. The bulbs should be planted quite close together, a 6-inch pot or pan will be sufficiently large enough for six bulbs. They are not hardy and are not suitable for outdoor planting.

4 MICHELL'S SINGLE EARLY TULIPS For Forcing and Bedding

CULTURAL DIRECTIONS—For Bedding Out: The bed should be formed of a compost similar to that recommended for Hyacinths. Plant the bulbs 4 inches apart and about 5 inches deep. They should be covered with a litter shortly before severe freezing weather sets in.

For Pot or Pan Culture—Plant about 4 bulbs in a 6-inch pot or 5 bulbs in a 6-inch pan, water thoroughly and then remove to the open ground or in a cold frame, covering with coal ashes; after they have rooted thoroughly they should be brought in a moderately cool room and gradually warmer; by bringing in a fresh supply from the outside every ten days, they can be had in bloom all winter.

To assist customers in making selections, we have affixed in front of the varieties figures denoting the approximate height where grown under the same conditions; also one of the following letters: V, E, M, L, to indicate the comparative blooming time, so that such sorts as flower together may be easily selected. V means very early; E means early; M means midseason; L means late.

DARWIN TULIPS

"Darwins" are a class of Tulips which bloom long after the other Tulips have flowered. The gigantic flower cups are borne on straight, stout stems, which rise far above a broad foliage and which commonly attain a height of 2 to 3 feet. For massing, bedding or border planting the Darwins are hard to equal. For pot culture they are splendid and are just the ideal Tulip to grow for Easter. The varieties marked with an asterisk (*) are most adapted for the latter purpose.

*20 **Clara Butt.** Delicate salmon pink. Its perfect shape and lovely color make it a real beauty. It is a good bedder and a splendid forcer. 60c. per doz.; per 100, \$3.50; \$30.00 per 1000.

23 **Glow.** Scarlet, margined white, blue centre. 75c. per doz.; per 100, \$5.25 \$45.00 per 1000.

*18 **Gretchen.** A most attractive variety of a soft salmon-rose color. Splendid for cutting. Good bedder and excellent forcer. 65c. per doz.; per 100, \$4.25; \$37.50 per 1000.

*16 **Inglescombe Yellow** (the Yellow Darwin). A large, globular, canary-yellow flower. A very popular variety, suitable for bedding or forcing. 65c. per doz.; per 100, \$4.25; \$35.00 per 1000.

25 **La Tulipe Noire** (the Black Tulip). Deep purple maroon, almost glittering black. Per doz., 75c.; \$5.00 per 100; per 1000, \$42.00.

*18 **Loveliness.** Soft rosy carmine, margined blush; good forcer. 60c. per doz.; per 100, \$3.50; \$30.00 per 1000.

26 **Madame Krelage.** Bright lilac rose, margined pale silvery pink, inside is a soft rose pink, very large flower of beautiful form. Per doz., 75c.; \$5.25 per 100; per 1000, \$45.00.

20 **May Queen.** Soft rose. Very large flower. Splendid bedding variety. 75c. per doz.; per 100, \$4.00; \$32.50 per 1000.

*26 **Mr. Farncombe Sanders.** Brilliant scarlet, with a white centre. Giant flowering. One of the showiest of all Darwins. Good forcer. 75c. per doz.; per 100, \$5.25; \$45.00 per 1000.

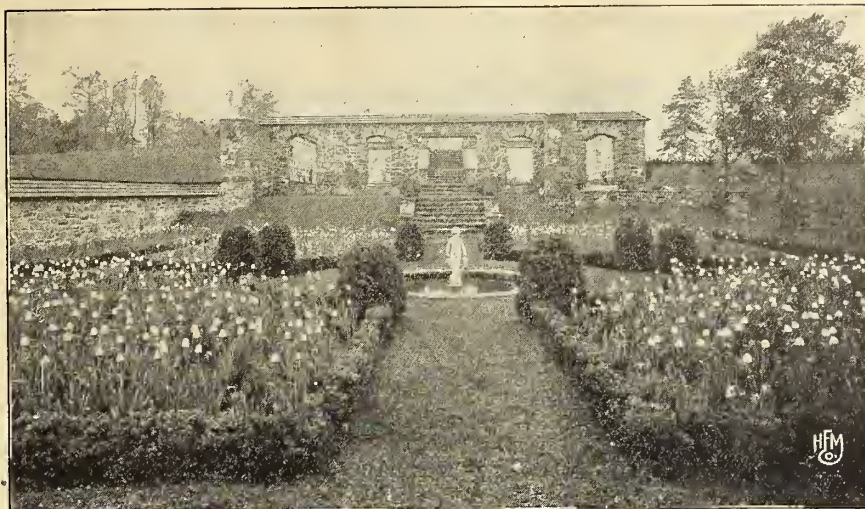

*24 **Pride of Haarlem.** Brilliant rosy carmine. This is one of the most popular varieties of Darwin. The size of the flowers is immense, having usually more than six petals, giving them the appearance of Double Tulips. Excellent forcer. 75c. per doz.; per 100, \$5.25; \$45.00 per 1000.

*20 **Rev. H. Ewbank.** Light heliotrope. Rather dwarf variety; a splendid bedder. For forcing we recommend this variety very strongly, as it stands forcing splendidly and produces large flowers of a very pleasing color. 75c. per doz.; per 100, \$4.75; \$40.00 per 1000.

20 **Sultan.** Very dark maroon, almost black. Undoubtedly the best of the dark varieties. The strong stems hold the flowers erect and make it an excellent bedder. 60c. per doz.; per 100, \$3.50; \$30.00 per 1000.

22 **White Queen.** Can be called the only white Darwin. It opens rosy white, but passes off pure white. One of the most popular varieties. 65c. per doz.; per 100, \$4.25; \$37.50 per 1000.

Darwin mixed, all colors. A great variety of all colors and shades. 50c. per doz.; per 100, \$3.00; \$26.00 per 1000.

COTTAGE GARDEN OR LATE TULIPS

Nothing in horticulture has received so much comment in late years as the late flowering tulips. They well deserve the popularity they have gained, for no other of the spring flowering bulbs can approach them for brilliancy, beauty and usefulness. For planting in beds, massing the perennial border or planting in clumps they are ideal. (All Single except where noted.)

This booklet contains not only the most up-to-date cultural directions in general, but giving a very concise detail to what use each variety is best put and in addition describing very explicitly each and every bulb offered in this catalogue. Mailed free on application.

MICHELL'S DOUBLE EARLY TULIPS

Double Tulips are used very extensively for forcing, but are equally valuable for bedding purposes. They remain in flower longer than do the single sorts on account of their substance, although they do not make quite as fine a show. They should not be planted in beds with single tulips, as they do not bloom as early as the single sorts. The number prefixed before the variety denotes the approximate height.

MICHELL'S BULB GROWING GUIDE

Bound into a heavy cover, we have issued the above booklet, containing not only the most up-to-date cultural directions in general, but giving a very concise detail to what use each variety is best put to and in addition describing very explicitly each and every bulb offered in this catalogue. We want every bulb grower to have one. Mailed or handed free on request.

DOUBLE NARCISSUS

Many varieties of Double Narcissus can be used for forcing, for which purpose they are highly desirable. Plant in a pan or pot anywhere from 3 to 12 bulbs, according to size of bulb. We offer large bulbs only. Parcel Post Weight of Double Narcissus, 1¼ lbs. per dozen; per 100, 10 lbs. Single bulbs mailed free.

Alba Plena Odorata. A very sweet-scented pure white variety called Double Poet's Narcissus; it flowers later than many of the other daffodils and is not desirable for forcing; height about 15 inches. 5c. each; per doz., 50c.; \$3.25 per 100; \$28.00 per 1000.

Double Jonquils (Sweet Scented). Pure golden yellow; deliciously fragrant. Clumps of these planted outdoors make a beautiful effect. Height, 12 inches. 5c. each; doz., 50c.; \$3.25 per 100; per 1000, \$27.50.

Incomparable Double. On account of the peculiar suffusion of the colors in the flower, this variety is also known as "Butter and Eggs." The color is yellow and orange, and makes an attractive cut bloom. Its greatest value is for outdoor planting, as it does not force so well. Height about 16 inches. 6c. each; per doz., 65c.; \$4.00 per 100; per 1000, \$35.00.

Orange Phoenix. Light yellow, almost white, with a yellow centre. It is splendid for forcing or pot culture. It is also called "Eggs and Bacon." Height, 16 inches. 6c. each; per doz., 60c.; \$4.25 per 100; per 1000, \$37.50.

Sulphur (or Silver) Phoenix. Flowers very large, bluish-white; the centre is sulphur colored; excellent for forcing or outdoor planting. Height about 18 inches. 6c. each; per doz., 60c.; \$4.25 per 100; per 1000, \$37.50.

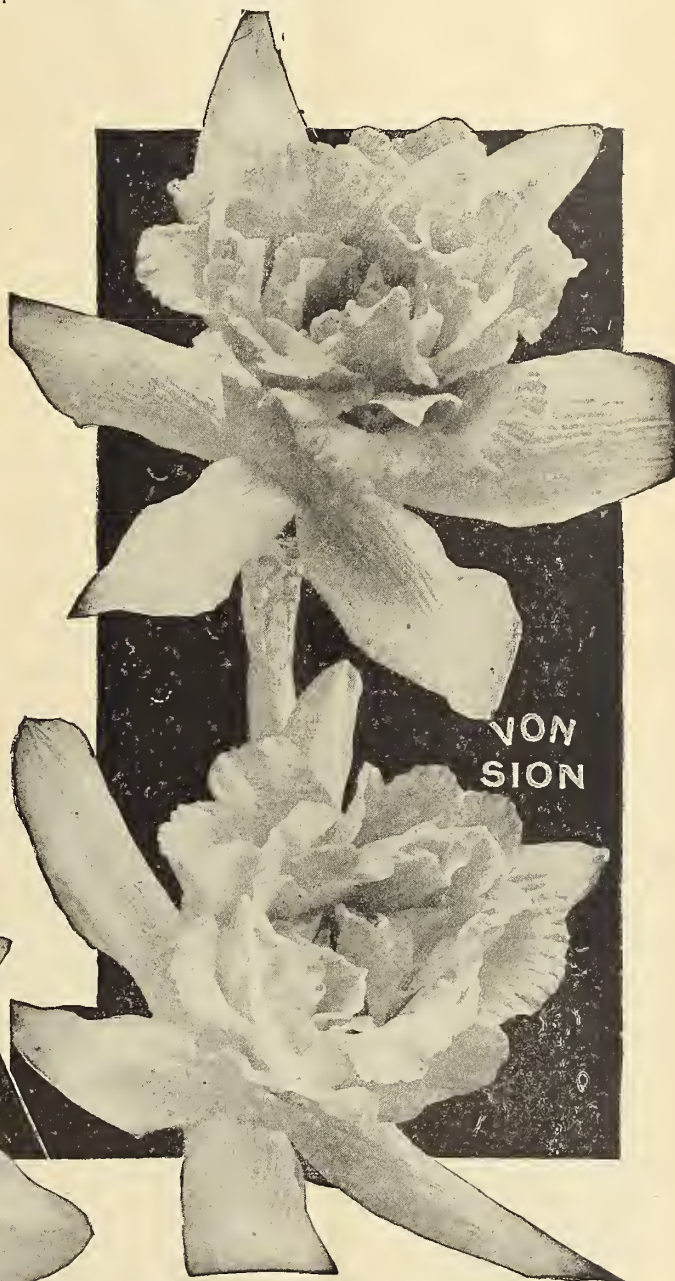

Von Sion (Telaminius Plenus). The true double daffodil. The color is a pure golden yellow, entirely free from green-tipped flowers, which are often found in cheap grades. For forcing or outdoor planting it has no equal. It should be planted extensively for naturalizing.

DOUBLE NARCISSUS (Continued)

Double Mixed Narcissus. All varieties. 5c. each; per doz., 50c.; \$3.25 per 100; per 1000, \$26.00.

SWEET SCENTED JONQUILS

These delightful flowers are especially graceful when grown in pans or pots, but do equally well outdoors. The slender foliage stalks enhance a most fragrant flower borne in clusters of 2 to 4.

Single Jonquils. Rich yellow, very fragrant, height 12 inches. 3c. each; per doz., 30c.; \$1.50 per 100; per 1000, \$12.00.

Double Jonquils. Flowers very double, deep golden-yellow, height 12 inches. 5c. each; per doz., 50c.; \$3.25 per 100; per 1000, \$27.50.

Campernelle. Single yellow; a grand forcer. 3c. each; per doz., 30c.; \$1.50 per 100; per 1000, \$12.00.

Campernelle Rugulosus. Single yellow; larger than the plain Campernelle. 4c. each; per doz., 35c.; \$2.25 per 100; per 1000, \$17.50.

Parcel Post Weight of Jonquils, ½ lb. per doz.; per 100, 3 lbs.

8 MICHELL'S SUPERB NARCISSUS or DAFFODILS

CULTURAL DIRECTIONS—The Double and Single Trumpet varieties should be treated in soil, and treated similar to Hyacinths. Chinese Lilies and Paperwhite Narcissus, and the Polyanthus type, such as Grand Soleil d'Or, etc., succeed very well if planted in water and pebbles. A small lump of charcoal prevents the water from getting foul, although changes of water are advisable.

No garden is complete without the Narcissus and Jonquils, and they really deserve the foremost place among bulbous flowers. They are perfectly hardy and increase from year to year. As a house bulb in winter they are indispensable, as their culture is of the easiest possible.

Note.—In describing Narcissus, Daffodils, etc., by "perianth" we mean the flower petals surrounding the cup or funnel; "Cup" refers to a short cup-like formation in place of the funnel. "Trumpets" is a word applied to the centre tube or funnel; to assist customers in making a selection we have affixed the height and time of flowering; the height in inches is denoted by figures; F indicates that a variety is suited for planting indoors for winter blooming.

GIANT TRUMPET VARIETIES (Continued)

13 F Madame de Graaff. The best and largest of the pure white trumpet daffodils. When it first comes into flower it shows creamy white, changing to pure white as the flower matures; late. Each, 15c.; \$1.20 per doz.; per 100, \$7.00.

15 F Sir Watkin (Giant Chalice Flower). The flower is probably the largest in its class, measuring often 5 inches across; for moderate forcing as well as bedding on a large scale; it is pleasing and very free-flowering; perianth lemon yellow, cup or crown deep yellow; very early. 10c. each; doz., 75c.; \$1.50 per 100; per 1000, \$40.00.

15 F Trumpet Major. One of the best varieties for forcing or outdoor massing; both trumpet and perianth deep golden yellow; very early. Each Doz. 100 1000

Narcissus Poeticus Ornatus (Natural Size)

THE OLD-FASHIONED POET'S NARCISSUS

This class is noted for its hardiness and freedom of bloom. It is one of the most popular types, used extensively for wild gardening and naturalizing. They are quite fragrant and are splendid for cut flowers.

15 F King Edward VII (Almira). An improved type, having magnificent large flowers with broad, round petals, a glistening white, and the yellow cup is edged deep red; a very early flowering variety. 7c. each; doz., 65c.; \$4.25 per 100; per 1000, \$37.50.

24 F Poetaz Elvira. This remarkable novelty is the result of a cross between the Pheasant Eye and the Polyanthus Narcissus, combining hardiness with the cluster flowering effect. The blooms which are pure white of remarkable substance and delicate yellow cup never come less than 3 to 4 to a long stem and from 2 to 3 stems are produced from a single bulb. The fragrance is distinct, resembling that of a Gardenia. It forces well and early. Each, 7c.; 65c. doz.; per 100, \$4.00; \$35.00 per 1000.

12 Poeticus Ornatus. A much improved form of the ordinary Poeticus, producing larger flowers and blooming two weeks earlier; especially adapted for forcing; mid-season.

HARDY NARCISSUS IN MIXTURE

For massing in borders, fields, woods and, in fact, anywhere, they more than return their cost in the liberal manner in which they flower, producing a wide range of color and variety of bloom. We offer large size bulbs only, which can be depended upon for results the first season.

Single Varieties. 50c. per doz.; per 100, \$3.25; \$26.00 per 1000.

Double Varieties. 50c. per doz.; per 100, \$3.25; \$26.00 per 1000.

POLYANTHUS NARCISSUS

This class of Narcissus is a most interesting one. They may be grown in water and pebbles like Chinese lilies, but they are equally suited for growing in soil. The flowers are produced in clusters, like the illustration, and they are delightfully fragrant. Not suitable for outdoors. Parcel Post Weight of Polyanthus Narcissus, 2 lbs., per doz.; per 100, 12 lbs.

Double Roman. White perianth, with an orange and yellow suffused cup very free flowering and early. 5c. each; per doz., 50c.; \$3.25 per 100; per 1000, \$27.50.

Gloriosa. A very showy type, with white perianth and orange yellow cup; very pretty. 10c. each; per doz., 80c.; \$4.50 per 100; per 1000, \$40.00.

Grand Monarque. Large, broad, white perianth with a primrose-yellow cup; a very striking flower. 6c. each; per doz., 60c.; \$4.00 per 100; per 1000, \$32.50.

Grand Primo. Large white perianth with yellow cup. 8c. each; per doz., 85c.; \$6.00 per 100; per 1000, \$55.00.

Grand Soleil d'Or (often called "Yellow Paperwhite"). Rich yellow, with deep red cup. For cutting this is a fine variety, as it makes a grand show. 10c. each; per doz., \$1.00; \$7.50 per 100.

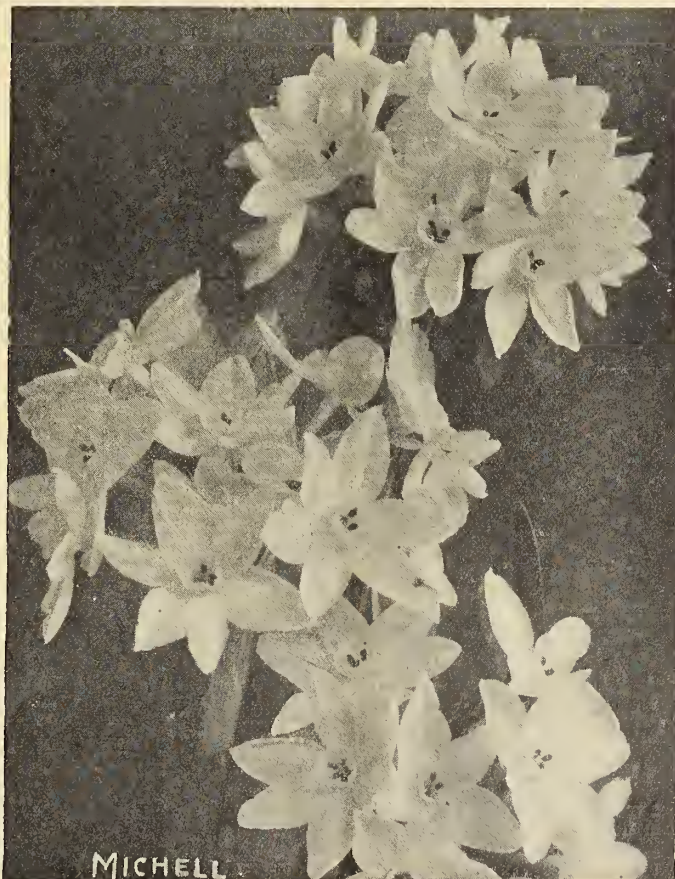

Paper White Grandiflora, First Size Bulbs. This is quite a specialty with us; of it alone we import two million bulbs. It is a pure white flowering sort; used extensively for forcing, as it can be brought into bloom in 8 weeks' time; the stems are very long and it is excellent for bunching. 6c. each; per doz., 60c.; \$3.50 per 100; per 1000, \$30.00.

Paper White Grandiflora, Mammoth Bulbs. 8c. each; per doz., 70c.; \$4.50 per 100; per 1000, \$40.00.

Paper White Grandiflora, Giant Bulbs. 10c. each; doz., 85c.; \$6.00 per 100; per 1000, \$50.00.

White Pearl. A large pure white; very exquisite. 10c. each; per doz., 85c.; \$6.25 per 100; per 1000, \$55.00.

Polyanthus Narcissus, Mixed. All colors and varieties. 6c. each; per doz., 60c.; \$3.75 per 100; per 1000, \$32.50.

10 MICHELL'S SUPERB EASTER LILY BULBS

For Indoor Culture

Cultural Note—In order to obtain best results, attention to the following brief directions will assist materially: Upon receiving the bulbs, pot them immediately. Place a handful of well-rotted cow manure in the bottom of the pot, add about one inch of soil, and place the bulb directly on top, covering it with soil. After watering, place in an outside pit; cover well with soil, ashes, or any other suitable litter. When thoroughly rooted, bring inside, in a temperature of about 60°; let the plants grow slowly under a bench or some other suitable place until about 6 inches high; then place on top of the bench. About two months before Easter they can be brought into a warmer temperature and gradually forced into flower and height at one time. An occasional application of liquid cow manure will stimulate the plant wonderfully. Spray the foliage once a day. Never allow the soil to get very dry, and never feed, unless the soil is moist.

From our experience, which we are sure compares with the experience of growers themselves, we have found that the best results from Easter Lily Bulbs of any variety are obtained when the bulbs are planted in *fresh new soil*. Every batch of Easter Lilies that are potted should be in soil that has never been employed in greenhouse work. You will be surprised to note the difference and the satisfaction that you will get from your Lily Bulbs.

(hb)

Lilium Candidum, (Madonna Lily)

NOTE—Owing to the uncertainty of ultimate costs to us, the prices on Japanese lilies are subject to change.

Cultural Directions: All Hardy Lilies should be planted from 6 to 8 inches deep, the Japan varieties even 12 inches deep; the bulbs should be completely enveloped in sand; no manure should come in contact with the bulbs, but may be placed 4 to 6 inches underneath. All loose petaled bulbs should be planted on their side instead of upright. Hardy Lilies are sometimes grown in pots for indoor blooming, in which case they are handled much like the Bermuda Easter Lilies.

JAPANESE LILIES

Auratum (*Golden Banded Lily from Japan*). Enormous; measuring frequently 8 to 12 inches across; pure white, spotted crimson; each petal is marked in the centre with a band of yellow. Flowers in August, delightfully fragrant; a single stem produces on an average from 8 to 15 flowers.

LILIUM CANDIDUM

(Sometimes called St. Joseph's, Madonna, or Annunciation Lily.) One of the most popular and satisfactory of the American garden lilies. Pure waxy white flowers produced on straight stems bearing anywhere from 10 to 30 blooms of good size and substance; delightfully fragrant. Effective plantings are the result of massing them in clumps or borders. Our bulbs are grown in Northern France, where they have a reputation of growing the finest in the world. To insure absolute success, plant the bulbs as early as possible—September preferred; blooms in June. (Ready now.)

LILIUM REGALE (Myriophyllum)

Introduced from China; absolutely hardy, also splendid for forcing; white suffused pink, shaded canary-yellow. \$1.00 each; doz., \$10.00.

Important—The new Plant Quarantine No. 37, which went into effect on June 1st, 1919, prohibits the importation of a number of bulbs, such as Allium, Anemones, Baby Gladiolus, Snowdrops, Scillas and others. We have, therefore not listed these bulbs, but we have made arrangements with our growers to produce these bulbs and we will be in a position to furnish same in best quality, if the law should be modified or repealed.

AMARYLLIS

One of the most gorgeous showy house plants, giving splendid satisfaction, not only because of their requiring little care, but of their everlasting nature and tendency to increase.

Cultural Directions—Place bulbs in live moss, only moderately moist, near a window of a warm room. Watch the bulbs carefully, and when the first sign of growth appears through the top, get a six-inch pot and be ready to pot up. The soil to be used should be fairly rich and when the bulb is set, most of it should be above the soil. Be moderate in watering first, but increase as growth increases, then place in a warm, light room near the window.

Formosissima (Jacobean Lily). Rich crimson flowers, splendid for pot or outdoor culture in summer. 25c. each; doz. \$2.50; \$15.00 per 100.

Hybrids of Vittata. Beautiful species, flowers striped and flaked. 60c. each; per doz., \$6.00.

Johnsoni. A very large crimson sort, striped white. Mammoth bulbs, 60c. each; per doz., \$6.00. First size bulbs, 40c. each; per doz., \$4.50.

BEGONIAS (Tuberous Rooted)

Ready in January

There hardly is a single garden in which there are semi or entirely shaded spots where the average flower will not grow; such places are ideal for this flower; yet it will make a dazzling show in the open. Enormous wax-like flowers appear uninterruptedly from June till frost. The bright flowers contrast well with the deep-colored foliage. The bulbs must be lifted in the fall. Plant bulbs outdoors about May 1st.

CALLA LILY BULBS

Callas require good, rich soil and plenty of warmth and water to make them thrive. Plant Callas indoors only.

Godfrey (Everblooming). This comparatively new calla has proven an excellent one; its character is exactly like the Aethiopica or regular variety, except it is of much dwarfer habit and freer bloomer; very desirable as a pot plant. Large blooming size bulbs, 25c. each; doz., \$2.75; \$17.50 per 100.

MICHELL'S MAMMOTH FLOWERING CHINESE LILIES

Place from 3 to 6 bulbs in a bowl on top of pebbles to the depth of 2 inches; also place a piece of charcoal with the pebbles to keep the water sweet. Place more pebbles around the bulbs so they will not topple over and then fill the bowl with water to the top of pebbles. After being planted they should be stored for three weeks in a cool, dark corner and then brought forth to a light but cool place, where they will grow to the highest point of perfection. Excessive heat produces quick growth, but will blight the buds and no flowers are the result; they also do best where no coal stoves or gas-lights are used in the room where they flower.

They may of course also be grown in pots with soil or sand, bulbs, fibre and moss. To have succession of blooms start a fresh bowl every 2 weeks.

SAGO PALMS (Cycas Revoluta)

These interesting as well as ornamental plants may be grown from the dormant (leafless) trunk or stem with great success. Their cultivation is very simple, may be wintered in any conservatory or light living room. During the summer they can be placed upon the lawn, where they are most appropriate ornaments. We have just received a consignment from Japan, which will be the last to arrive, as the Plant Exclusion Law, which took effect June 1, 1919, prohibits the further importation of these. Fine strong dormant stems. 30c. per lb.; 5 lbs., \$1.25. Stems vary from 2 to 5 lbs. each.

FREESIA "PURITY"

This grand type supersedes all the old varieties of Freesias. The flowers are almost twice the size of the regular type; they also differ somewhat, being a pure glistening white; the stems are often 15 inches long and very wiry, rendering it a most valuable cut flower. Each bulb will produce 3 or 4 flower stems.

LILY OF THE VALLEY (Ready in December.)

A beautiful pure white flower; principally used for winter forcing. Very fragrant and produced in abundance. For indoor culture plant about 25 pups or roots in a 7-inch pot or pan, place outside, where they should be left until they have been subjected to several nights' freezing, which brings them into flower more readily. When grown outdoors always plant in a shaded place, preferably moist. For outdoor culture, we especially recommend the clumps, as they give a quicker and better effect at less cost. Parcel Post Weight, 6 lbs. per 100.

Michell's Fancy Giant Flowering. The finest strain of Valley procurable. Price on application.

Clumps. Ready in November. For outdoor planting only. 50c. per clump; per doz., \$5.00; \$35.00 per 100.

MICHELL'S "DISTINCTIVE" STOCKS

The stock is one of the most popular and highly prized of our cultivated flowers, either for the garden or for pot culture. The charming colors, delightful fragrance and free blooming character, have made them favorite plants for both summer and winter cultivation. The seeds we offer are hand-saved from pot-grown specimens and will produce a large percentage of double flowers.

Alfalfa from a well prepared Seed Bed—No Inoculation

Alfalfa from a well prepared Seed Bed—Inoculated

The most Fertilizer Value of Legumes depends largely upon Inoculation with these Bacteria. 1000 to 2000 Pounds of Nitrates to the acre can be deposited in little sacks or nodules on the roots of the legumes, which will be immediately available for any following crop. Legumes embrace all of the various types of clovers, peas, beans and such other plants that have blossoms similar in shape and form to the above named. This type of plant has the ability of taking from the air vast quantities of free nitrogen, which exists there and which is not absorbed by other plants than those which belong to the legume family. This nitrogen is taken (breathed so to say) through the stems of the plant and deposited at the roots in little sacks or nodules, where it becomes immediately available as plant food in the form of nitrates. The application of bacteria to the seed of these legumes when planting practically trebles the nitrogen-gathering power and for this reason we urge all planters to use it on all such occasions. Please note that the bacteria is not applicable to any other class of plant through inoculation, except as noted below; succeeding crops, though, following on ground where bacteria was used, derive tremendous benefits, as many plants that are not legumes require quantities of nitrates as plant food. The following crops are in season for sowing now and should be inoculated:

**Alfalfa, Alsike, Crimson Clover,
Red Clover, Vetch.**

We can also furnish culture for all other legumes.

Have a RICH, GREEN LAWN ALL WINTER from an application of

PREPARED ALPHANO HUMUS "THE IDEAL SOIL ENRICHER"

It is prepared from a rich deposit of decayed vegetable and animal matter. In its course of preparation for use as a soil builder and enricher, it is composted for a long period, and supplied with all the legume and other beneficial soil bacteria. 80 per cent. of the moisture is driven out, and a liberal quantity of rich, concentrated plant foods and bacterial nutriment of highest fertilizing value are added. It comes to you, finely pulverized, odorless, and entirely free from weed seeds.

It is rich in ammonia, phosphoric acid, potash and lime, and is lively with the various bacteria so essential to soil fertility.

For lawns it is applied as a top dressing from 1/2 to 1 inch depth, which should be then worked in.

If grass seed is to be sown, then is the time to apply it. On golf links it is used in a similar way.

For Flower and Vegetable garden, apply at rate of 1/2 to 2 inches deep, and fork it well in the soil, or apply it in trenches, the same as you would well-rotted manure. For pot plants, mix about 1-3 of the Alphano with 2-3 of regular potting soil.

A ton of Prepared Alphano Humus is equal to nearly 2 cubic yards. For top dressing lawns an application of 100 lbs. every 800 sq feet will be effective. For distribution in large quantities, say 1/2 inch thick, 30 tons is required per acre; if 1 inch thick application is desired, 60 tons per acre; if 2 inches thick, 120 tons per acre.

ASPARAGUS ROOTS

(Ready after October 15th)

4,000 to 6,000 roots required for an acre, according to the distance set apart.

Asparagus roots are planted quite extensively during the autumn and invariably give good results, we do not advise planting after the ground has been frozen at that season.

CAULIFLOWER (Varieties Suitable for Forcing)

Michell's Earliest Snowstorm. Colossal heads of purest white, averaging often 10 inches in diameter; being very long and compact, it gives enormous weight to the individual heads. Pkt., 25c.; 50c. per large pkt.; $\frac{1}{4}$ oz., \$1.75; \$3.25 per $\frac{1}{2}$ oz.; 1 oz., \$6.00.

Michell's Special Strain Selected Erfurt. One of the earliest in cultivation, small leaved dwarf; splendid forcer. Pkt., 25c.; 50c. per large packet; \$1.25 per $\frac{1}{4}$ oz.; \$4.50 per oz.

Early Snowball. A splendid early variety, producing magnificent medium size white heads. Pkt., 20c. and 50c.; \$1.00 per $\frac{1}{4}$ oz.; $\frac{1}{2}$ oz., \$1.75; \$3.00 per oz.

FORCING CARROTS

Early Half Long Scarlet. A very desirable pointed root variety of fine flavor and good color. Pkt., 10c.; 20c. per oz.; 65c. per $\frac{1}{4}$ lb.; per lb., \$2.25.

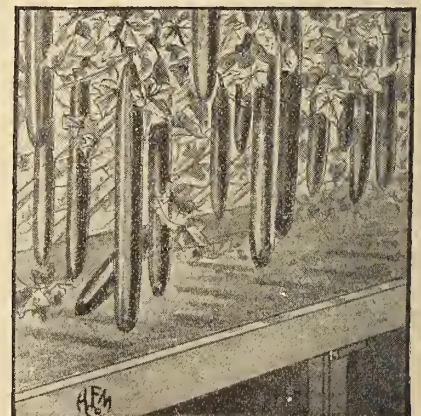

Rubicon Half Long. Of excellent shape and extremely well adapted for early forcing. Pkt., 10c.; 25c. per oz.; $\frac{1}{4}$ lb., 75c.; \$2.75 per lb.

Oxheart or Guerande. An early forcing variety; small round roots, not much larger than a Radish. Pkt., 10c.; 20c. per oz.; $\frac{1}{4}$ lb., 65c.; \$2.25 per lb.

ENGLISH CUCUMBERS

These are splendid for growing in hotbed frames during the summer months, in preference to the open garden ground. They can thus be started earlier and protected during cool nights, as they are more tender than the regular outdoor varieties. They may also be grown under glass in greenhouses during the winter, producing enormous fruits, generally 18 to 24 inches long and 3 inches in diameter. They have a delicate flavor and possess very few seeds; for slicing, no other sorts can approach them.

CORN SALAD (Fetticus)

Mache Ronde (Fr.);
Ackersalat (Ger.)

This is principally sown for a supply of greens during winter and early spring months. Sow in September broadcast; when cold weather approaches, cover with a litter of leaves or long manure or straw, and upon approach of spring the covering can be taken off entirely. It can also be gathered on mild days during winter.

Large Leaved, Round Seeded. Pkt., 10c.; 20c. per oz.; ¼ lb., 65c.; \$2.25 per lb.

WATER CRESS

This may be grown on a greenhouse bench just as successfully as along a stream of water, and a continuous crop may thus be assured regardless of weather conditions. Nothing can compare for flavor with the delicious tenderness of young Water Cress.

True Erfurt. Pkt., 10c.; 40c. ½ oz.; oz., 75c.; \$2.50 ¼ lb.

Water Cress

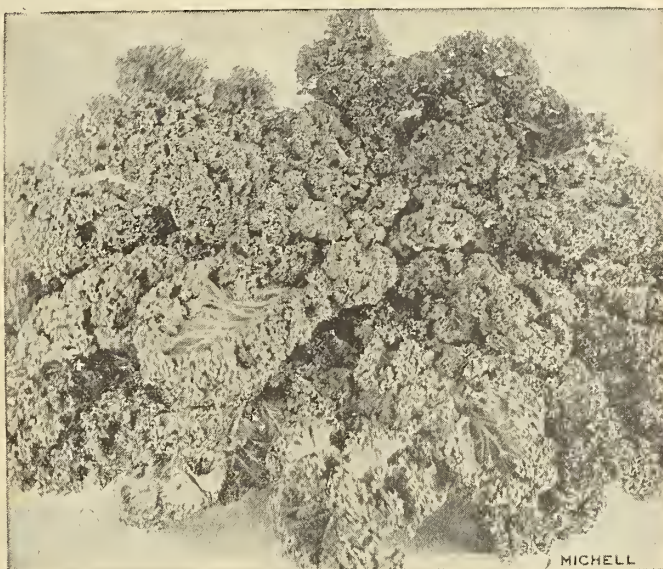

Witloof Chicory

WITLOOF CHICORY ROOTS (Ready December 1st.)

Used only as a winter vegetable, the top part only being edible. Plant under a bench in the greenhouse or a light, dry, warm portion of a cellar in a bed of rich garden soil 12 inches deep, place

WITLOOF CHICORY (continued)

about 6 inches apart each way. The top growth remains intact, as the illustration shows, and may be cut any time after 5 inches growth, before the heads begin to expand. Roots should be set in the soil the same depth as they were originally in the garden. A continuous supply of this delicious winter vegetable can be had from December 1st to April 1st. A cold frame makes also an ideal place for forcing them in the late winter or early spring months. Strong Roots, 75c. per doz.; per 100, \$5.00.

Dwarf Curled Scotch Kale

KALE OR BORECOLE

Chou Vert (Fr.); Grun Kohl (Ger.); Cavolo Verde (Ital.) One ounce will sow a drill 150 ft. long; 3 lbs. will sow an acre.

For early use it may be sown in May; when desired for winter use, sow in September, broadcast or in rows 2 ft. apart. Cover for protection against severe freezing and snow. Do not handle while in a frozen condition. One of the finest nutritious greens for winter and early spring use.

Dwarf Green Curled. This variety is very compact growing, rarely attaining a height over six inches. The color is dark green, very curly. 10c., pkt.; 30c. oz.; \$1.00 ¼ lb.; \$3.25 lb.

Imperial Long Standing. The leaves are very crimp and of a dark green color. It stands quite tall, and is an excellent producer. It is just as hardy as any of the other sorts, and will be found very profitable where quantity as well as quality is desired. Pkt., 10c.; 25c. per oz.; ¼ lb., 75c.; \$2.50 per lb.

MUSTARD

Fine winter greens if sown in a heated frame or greenhouse, also fine if served with lettuce for flavoring. The seed can be harvested if the plant is allowed to stand and used for other culinary purposes. One ounce will sow a row 75 feet long. It makes a delicious green salad, pungent in taste, highly palatable and healthy. Sow every two weeks in rows the same as spinach. It must be used while young, as only then is it tender and mild.

PARSLEY

One ounce will sow a row 100 ft. long

After soaking the seed for a few hours in warm water, it should be sown in rows 18 inches apart, and when 2 inches high thinned out so the plants will stand 4 inches apart in the row. It takes parsley seed from 3 to 6 weeks ordinarily to germinate, so that a little patience in growing this is necessary. Parsley can be continued over winter, if given a heavy covering of long manure.

MIXTURES FOR MISCELLANEOUS PURPOSES

Michell's Permanent Pasture Grass Seed. In the past few years ideas of what was the best way to establish a permanent grazing sod have undergone many changes. The old prevalent method of sowing timothy and clover has been found not only costly, but too short-lived to answer the purpose. The old custom has given way to the new, which is the sowing of a mixture of permanent grasses. Michell's Permanent Pasture Grass Seed is composed of about 10 of the best growing and most nutritious grasses and clovers for stock feeding or grazing. One sowing will last many years, although we advise additional sowing each autumn, just previous to which a light harrowing is recommended to give the grass a quick hold. Sow 3 to 4 bu. per acre on new land or 2 bu. on established pastures (20 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 75c.; per peck, \$1.00; per bu. (20 lbs.), \$3.75; 100-lb. lots and over, 18c. per lb.

Michell's Permanent Hayfield Grass Seed. While timothy is still extensively sown for this purpose, this mixture is gradually being adopted by the progressive farmer. Its main advantages are that certain grasses in this mixture will grow better in varying conditions of soil, thus giving a full crop of hay on land that otherwise might produce but a half crop of timothy and clover. Our formula is the outcome of thorough trials in every kind of soil. Sow 3 to 4 bu. per acre on new lands or 2 bu. on established fields (20 lbs. per bu.). Prices: per qt., 20c.; 4 qts., 75c.; per peck, \$1.00; per bu. (20 lbs.), \$3.75; 100-lb. lots and over, 18c. per lb.

Michell's Poultry Yard Grass Seed. Chickens love grass and should be placed where they can get it as much as possible. We put plenty of clover seed in this mixture, as it is very nutritious, and the fowls relish it (15 lbs. per bu.). 20c. per qt.; 4 qts., 60c.; 90c. per peck; bu., \$3.00.

WHITE CLOVER

Choice recleaned for sowing on lawns, pastures, etc. Sow 10 to 12 lbs. per acre (60 lbs. per bu.). Per ¼ lb., 20c.; 75c. per lb.; 5 lbs., \$3.65; \$7.00 for 10 lbs.; per bu., \$40.00; per 100 lbs., \$65.00.

GRASSES IN SEPARATE VARIETIES

All Strictly Recleaned and Carefully Tested for Purity and Germination.

Prices Subject to Market Changes

Crimson Clover

CLOVERS

Alfalfa or Lucerne (*Medicago Sativa*). It is sown during May, August and September. Careful preparation of the soil previous to sowing is the main thing. Our special Circular on Alfalfa goes into this carefully and is free for the asking. Sow not less than $\frac{1}{2}$ bushel (30 lbs.) per acre preferably with no other crop. Our seed will give the best of results. **Choice Non-Irrigated Western Grown Seed.** Price on application.

Grimm Alfalfa. Claimed to be hardy in any and all regions, a heavy yielder and of deeper rooting ability. It requires about 10 lbs. of Grimm Alfalfa to properly seed an acre on account of its great root system and spreading habit. Price on application.

Alsike or Swedish Clover (*Trifolium Hybridum*). One of the best for mixing with timothy; it is perfectly hardy in every climate or soil condition, it grows from 1 to 2 feet high. Sown early in the spring or late summer and early autumn. It is as nutritious as red clover and is rapidly coming to the front as a valuable farm crop. The flower resembles the white clover, except that the head is larger and has a red tinge on the edge. Sow 10 to 15 lbs. per acre alone or 8 lbs. per acre with timothy. Price on application.

Bokhara or Giant Sweet Clover (*Melilotus Alba*. Syn *M. Leucantha*). Used either as a feed crop or as a fertilizer to plow under. Grows from 4 to 6 feet high, thriving on almost any kind of soil. If you have thin, rocky, hard or sour soil, which you wish to enrich, this is just the crop for you to grow. It will make two hay crops the first year. **We handle only the true, white-flowered variety.** Sow 15 lbs. per acre in early spring alone, or 10 lbs. per acre with other crops. Price on application.

Crimson Clover (*Trifolium Incarnatum*). This is used principally for soiling or green manuring, for which purposes it is highly valuable. If desired for feed, cut it just before it flowers. When desired for green manure, it should be allowed to mature; its height is from 1 to 2 feet. Sow any time from April to October, the earlier the better, 20 lbs. to the acre. Price on application.

Mammoth Red Clover (*Trifolium Pratense Perenne*). Sometimes called Sapling or Pea Vine Clover and English Cow Grass. This differs from the "Medium," being of a ranker growth and yielding more fodder per acre. It ripens somewhat later and is more hardy, lasting several seasons longer than the medium red clover. It also does well on poorer soils. The seed cannot be distinguished from the former. Our supply, however, is strictly reliable. Sow in early spring or in July and August, using 20 lbs. per acre alone or with other crops 10 lbs. per acre; flowers pink. It can be harvested several times in a season. Price on application.

Red Clover, Medium (*Trifolium Pratense*). More widely known and used than any other, used principally for hay purposes. Height from 18 inches to $2\frac{1}{2}$ feet. Sow early in the spring or in late summer—July and August; if alone, 20 lbs. per acre; if with other crops, 10 lbs. per acre. It is not hardy for a period of years, being usually resown every third season. Flowers pink. Price on application.

CLOVERS (Continued)

White Dutch or Lawn Clover (*Trifolium Repens*). This is valuable for pasturage; it succeeds where other clovers and grasses fail, and it seldom dies out. It can be sown at all seasons, although early spring is best; flowers greenish white. Sow 10 to 12 lbs. per acre if alone or 5 lbs. if sown on old turf or with other crops. $\frac{1}{4}$ lb., 20c.; 75c. lb.; 5 lbs., \$3.65; \$7.00 for 10 lbs. Price for larger quantity on application.

DWARF ESSEX RAPE

For pasturing sheep and hogs. Sow 6 lbs. per acre broadcast. Price on application.

WINTER RYE

Penna. Large White. Sow 1 to $1\frac{1}{2}$ bushels per acre during fall. An excellent green food in spring, and may be used for turning under or harvesting. Price on application.

Rosen. A new strain, very long, stiff straw, large yielder, producing almost 50% more than ordinary rye. Price on application.

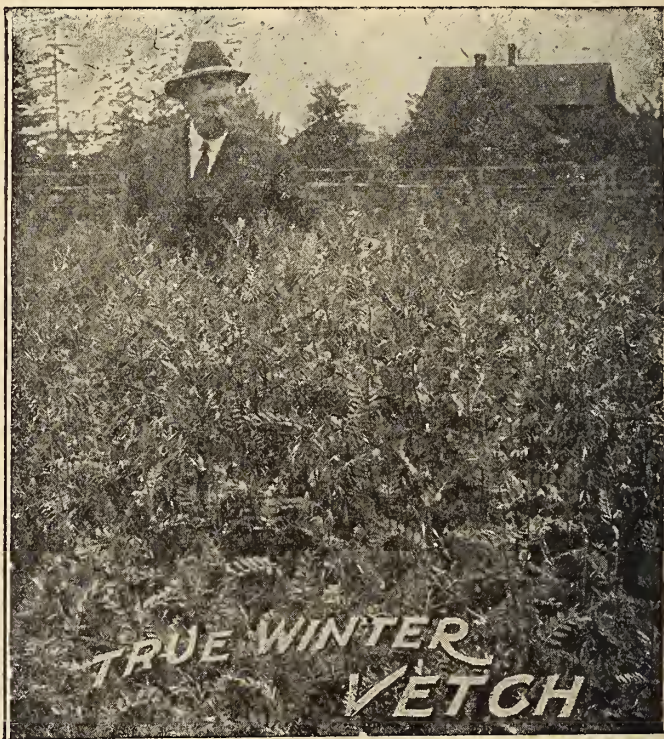

RECLEANED TIMOTHY

Our stock is of very best quality; for sowing among wheat as a second-year hay crop or for sowing alone for a first-year hay crop this is extensively used. Sow $\frac{1}{2}$ bu. per acre alone or 6 to 8 qts. with wheat. Write for price.

WINTER VETCH (*Vicia Villosa*)

True Sand or Hairy Vetch

Our stock of this is the true type, which will absolutely live throughout the winter. There is also an English strain on the market which is not hardy in the Northern sections of the United States, and buyers should beware when buying that they procure the right article, which is a small round black seed. It is far superior to Crimson Clover, as it never winter-kills. Sow from August 1st to October 1st, but the earlier the better, broadcast, 1 bushel per acre, to which we suggest adding a bushel of winter rye or wheat. In the spring it can be plowed in as green manure, or when in flower, cut for hay. All stock relish it keenly. Price on application.

Four-Rowed Fultz

CHOICE SEED WHEAT

FOUR-ROWED FULTZ (Beardless)

Four-rowed Fultz has a tendency to produce spikelets composed of four grains of wheat arranged in a row close together. Although the heads are only of medium length, in most cases they contain more wheat than heads of other varieties that are much longer.

Four-rowed Fultz is **extremely early**. The berry is of medium size, hard, red in color. Chaff is white. Straw is of medium length, strong and stiff.

On average and rich soils, Four-rowed Fultz will give straw of great length, will stool out wonderfully, making a thick growth.

Four-rowed Fultz has numerous records of yield of 40 bushels per acre on average land. On select land as much as 50 bushels per acre has been harvested. Sow $1\frac{1}{2}$ to 2 bushels per acre.

"FULTZO-MEDITERRANEAN" (Beardless)

This is a cross of the "Fultz" and the old "Mediterranean" Wheats. The berry is short, plump and red. Chaff white and smooth. The heads are of medium length, very compact, well filled and inclined to widen at the top. For earliness or stiffness of straw it cannot be excelled. It stools well and $1\frac{1}{4}$ to $1\frac{1}{2}$ bushels per acre is sufficient to sow. It frequently produces over 40 bushels per acre.

LANCASTER FULCASTER (Bearded)

A reselection from the old "Fulcaster" and one of the purest wheats now offered.

There are few other varieties that will do quite as well on soils of average quality. Farmers who are not able to raise even fair crops on rather thin soils should sow "Lancaster-Fulcaster." Even under adverse conditions this variety will produce a satisfactory crop of straw and a surprising crop of grain. The grain is of finest quality, a genuine long berry, dark red and hard. The chaff is white and the straw is long and stiff.

Lancaster-Fulcaster will carry through extreme winters and withstands attacks of insect pests and disease better than any other variety. Sow $1\frac{1}{2}$ to 2 bushels per acre.

LEAP'S PROLIFIC (Beardless)

A most prolific variety indeed, and may be relied upon to give big crops. It stools out strongly and roots deeply. The grain is large, dark red and of the best milling qualities. The heads are large, the chaff is beautiful white and is without beards. "Leap's Prolific" is one of the earliest to ripen and we recommend it as an all around good variety. Sow $1\frac{1}{2}$ bushels per acre.

"MIRACLE" (Bearded)

This valuable Wheat was introduced by us in the vicinity of Philadelphia in 1911. It produces a magnificent, heavy growth of straw, which is very stiff and erect. The head is bearded and contains well-shaped wheat berries of a semi-hard red nature of excellent milling qualities. It is a tremendous stooler, one grain producing as many as 25 stalks with often 45 grains to the head or stalk. It is readily seen that this wheat should produce on average conditions an enormous crop, its usual rating being anywhere from 40 to 50 bushels per acre under average conditions. The introducer impressed upon us very forcibly **not to recommend the sowing of more than one-half bushel per acre**, as if seeded heavier it is liable to choke itself, on account of its free stooling habit. It is early to mature and produces straw often 5 feet high.

PRICE'S WONDER (Bearded)

It bears the longest heads of any wheat we know of and thrives under the roughest treatment. It may be sown very late in the fall under the most adverse conditions with every confidence of profitable crops to follow.

Our grower says that everything about Price's Wonder is long. Long in the berry, long in the straw, very long bearded heads and long in the yield. The grain is hard and dark red, while the chaff is white. The straw is long and stiff. $1\frac{1}{4}$ to $1\frac{1}{2}$ bushels per acre is all you need to sow.

Prices of Seed Wheat fluctuate constantly and will be quoted on application.

MICHELL'S FIELD GROWN ROSES for planting this autumn

After November 1st we will be in position to supply strong field-grown roses for planting out at that time, (a list may be had on request). You will save time and money by buying and planting them this autumn, shipment of this stock can safely be made by parcels post. Our stock consists of Hybrid Perpetuals, Hybrid Teas, Teas and Climbers.

Price for strong field-grown stock is: 60c. each; dozen, \$6.00.

SEEDLINGS

Ready after September 15th.

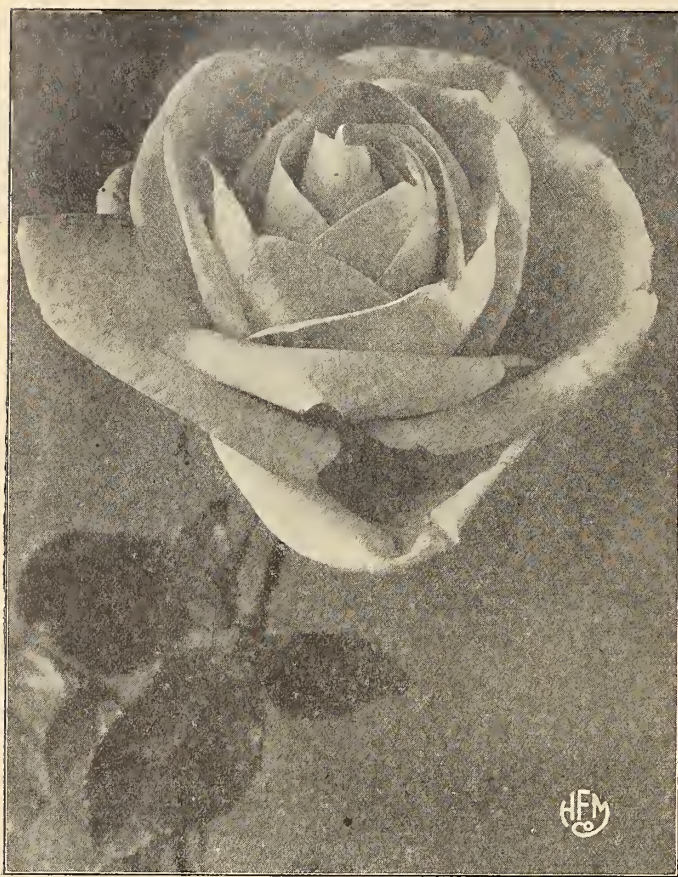

Many gardeners prefer to purchase their supply of these instead of growing them and for those we have produced a fine lot of the following, which will be ready about Sept. 15th:

Pansies. Michell's Giant Exhib. Strain.

Bellis. Monstrosa. Giant English Daisy, in pink and white, each separate.

Myosotis (Forget-me-not). Alpestris Victoria.

Any of the above can be supplied in not less than 100 of a kind. \$1.50 per 100; per 1000, \$10.00.

Hybrid Tea Rose

Type of Michell's Giant Exhibition Pansy, 2-3 Size

Carnation

Field Grown CARNATION PLANTS

These are ready now in fine condition for either potting or for planting in benches, our list contains the leading sorts but owing to the uncertainty of the supply of the exact varieties customers are requested to select the colors desired leaving the variety to us. Prices, \$3.50 per doz.; per 100, \$25.00.

VIOLET PLANTS

These extra-fine plants will flower freely under glass in winter or in cold-frames and outdoors in the early spring.

Lady Hume Campbell. Double, light blue. (Pot-grown.)

Princess of Wales. Single blue.

Prices for any of the above extra large plants, 25c. each (by mail, 30c.); \$2.25 per doz.; per 100, \$15.00.

Our Violets are extra large field-grown clumps and are worth many times more than small plants at low prices.

Testimonial.

Manderson, S. D., June 3, 1919.

You certainly take the cake for packing *plants* well. That basket of plants you sent me by express was just opened yesterday, just one month after they left your hands. Every plant was in perfect condition. Your *seeds* also are unusually fine.

EDGAR M. KEITH.

MICHELL'S HYDRANGEAS for forcing

Private gardeners and others with greenhouses will find hydrangeas splendid as winter flowering pot plants, and for Easter. Many heretofore popular plants such as Spireas, Azaleas, Rhododendrons and the like are unobtainable; Plants of Hydrangeas placed in a moderate greenhouse temperature may be forced at will and are beautiful indeed, our list embraces the best sorts. The Otaksa variety is planted outdoors extensively for summer bloom, but we do not recommend setting them out in the autumn.

Special Note—Blue is a color that is not fixed in Hydrangeas. It is controlled sometimes by climatic, and other times by soil conditions; we cannot supply blue flowering Hydrangeas.

Deltioides Alba. A white flowered variety. Price of Dianthus, 25c. each; doz., \$2.50; \$15.00 per 100.

DELPHINIUM (Larkspur)

In view of the wonderful display that Larkspurs make, it is worth while to exercise care in locating a most suitable position and in the preparation of the ground, the latter should have a good natural drainage. Never use animal manure in planting delphiniums, unless it has been incorporated in the soil a year before planting. Pure bone-meal is the best fertilizer in promoting growth, apply with it also some wood ashes; the latter will assist in holding in check earth grubs, which at times attack the roots and crowns of the plant. In order to keep Larkspurs in bloom continuously during the summer, cut the old flower stems off, after they have faded, and new shoots will produce flower heads in succession. To get the best out of hardy Larkspurs in the way of flowers, feed them occasionally during the growing season with an application of ground bone. A slight covering of long straw or leaves over the crowns of the plants during winter will prove a great benefit.

Bella Donna. The freest and most continuous blooming of all. The clear turquoise-blue flowers are not surpassed by any. 25c. each; doz., \$2.50; \$17.50 per 100.

Chinense Album. Same as above in white. 25c. each; doz., \$2.50; \$15.00 per 100.

Chinense Azureum. Plants grow but 2 feet tall, branch freely, each branch terminating with a loose spray of single flowers; color, a deep clear blue. 25c. each; doz., \$2.50; \$15.00 per 100.

Formosum. Dark blue, white centre, spikes 3 to 4 feet tall, vigorous; free blooming. 25c. each; doz., \$2.50; \$15.00 per 100.

Mitchell's New Hybrids. Mixed. These are the cream of seedlings from a famous strain of English varieties. 25c. each; doz., \$2.50; \$17.50 per 100.

Chrysanthemum Arcticum (See Page 39)

DICTAMNUS (Gas Plant)

One of the hardiest of all perennials, which often will last for a generation and longer. The foliage is fragrant while the spikes of rather oddly shaped flowers emit a luminous vapor, which is said to be inflammable. Height about 2 feet, flowering in June and July.

Fraxinella. Pink flowers, dark veins.

Fraxinella Alba. Pure white.

Each of the above, except where noted. 25c. each; doz., \$2.50; \$15.00 per 100.

DIELYTRA (Bleeding Heart)

Spectabilis. One of the most beautiful border and shrubby plants, with graceful, fern-like foliage and attractive heart-shaped pink and white flowers appearing in April. Large roots. 35c. each; doz., \$3.75; \$25.00 per 100.

ECHINOPS (Globe Thistle)

Ritro. For shrubberies and borders, producing handsome, blue, globular flowers; valuable for cutting. 3½ feet. 25c. each; doz., \$2.50; \$15.00 per 100.

Dielytra Spectabilis

EPIMEDIUM (Bishop's Hat)

Small orchid-like flowers; April-May.

Alpinum. Reddish violet.

Bicolorum. Red and yellow.

Niveum. Pure white.

Sulphureum. Sulphur-yellow.

Price of Epimediums, 25c. each; doz., \$2.50; \$15.00 per 100.

EUPATORIUM

This is an effective plant, which produces fuzz-like flower heads. August till frost. It is fine for cutting.

Ageratoides (White Snakeroot). Pure white. 3 to 5 feet, flowering in August and September; a fine native plant.

Coelestinum. Light blue, flowering in August; 18 to 24 inches.

Purpureum Maculatum (Joe Pye Weed). Flower heads purple to flesh color. 4 to 6 feet.

The above 25c. each; doz., \$2.50; \$15.00 per 100.

Gaillardia

FUNKIA (Plaintain or Day Lily)

These attractive plants make fine effects, nothing is more handsome in a garden border or a hardy bed edged with the dwarf green and a variegated foliage of the Media Picta variety, also does well in shade.

Coerulea. Dark green foliage, with light blue flowers.

Subcordata Grandiflora Alba. This is a large loose-growing variety, with large blue flowers and broad foliage.

Undulata Media Picta. Green foliage, with distinct white markings. Lavender blue flowers. This is the best of the edging varieties.

Price of Funkias, 25c. each; doz., \$2.50; \$15.00 per 100.

GAILLARDIA (Blanket Flower)

One of the most useful of the hardy flowers. When planted in clumps, beautiful flowers are borne in profusion and make a striking effect. They last a long while as a cut flower, and are abundant from June until frost. Height, about 2 feet.

Grandiflora. Dark brown centre, petals on the outer edge are yellow, and the centre is surrounded with a rich orange disc. 25c. each; doz., \$2.50; \$15.00 per 100.

GENTIANA (Gentian)

These are amongst the most desirable of Alpine plants and are of one of the prettiest shades of blue to be found in the garden.

Andrewsi (Closed Gentian). Large terminal and auxiliary clusters of blue flowers, about 2 feet high. July-August. 25c. each; doz., \$2.50; \$15.00 per 100.

Hardy Phlox Mrs. Jenkins

The most effective border plants during August and September. They succeed in almost any soil enriched with manure. In partial shade the flowers last much longer than when grown in the full sun. If the first spikes of bloom are removed as soon as over, and the plants given a good soaking of water, they will produce a second supply of flowers, thus continuing until late in autumn. The varieties we offer represent the finest of the existing Hardy Phloxes.

Africa. Rich royal purple, suffused crimson.

America. One of the most free-flowering Pink Phloxes.

Baron von Dedem. Deep pink, suffused orange.

B. Comte. Brilliant rich purple; a distinct shade; the flower heads are very compact and attractive.

Braga. Rich lilac rose, immense trusses of great beauty.

Crepuscle (New). Very large flowers, shading from a deep crimson centre, through rose lilac to a white edge; a beautiful blending of colors.

Electra. A brilliant red, with a darker shade; one of the very best.

Elizabeth Campbell. Delicate refreshing pink with a white eye.

Eugene Danzanvilliers. Delicate lavender; very attractive.

Europa. Blush white, with a large deep pink centre, making it a very showy combination.

Fantasy. (Suffr.) Rosy mauve.

Frau Anton Buchner. Very large pure white flowers.

Frithjof. Light violet, without eye. The trusses are very large.

Goliath. The flower trusses are large and of a bright cerise color with deep eye.

Grideur. Soft rosy mauve, heavily suffused and overlaid with a lovely deep shade of cerise, giving the whole a beautiful mottled appearance.

Indian Chief. (Suffr.) Dark purple.

Iris. A deep reddish violet, of compact erect habit with flower trusses that rival any others for size.

Jules Sandeau. Dwarf; very large flowering; pure pink; extra fine variety and free bloomer.

Le Mahdi. A royal deep purple.

Madame Paul Dutrie. Delicate soft pink.

Minerva. Lilac rose, marked with white, with a bright carmine eye; showy spikes; very compact.

Miss Lingard. (Suffr.) White, lilac eye.

Montagnard. Deep purple claret; large spikes and flowers.

Mrs. Greenlees. (Suffr.) White, rosy centre.

Mrs. Jenkins. Of medium height, with immense clusters of pure white flowers; very effective when planted in masses.

Rheinstrom. A splendid new phlox with gigantic flowers of a bright pink.

Rosamundi. Immense trusses of a beautiful soft rose color.

Tapis Blanc. (New.) Undoubtedly the best semi-dwarf pure white. It flowers early and continues until late.

Von Lassburg. The Queen of all clear white phloxes; trusses and single flowers are immense in size.

W. C. Egan. One of the prettiest in our entire collection, the color being a pale lilac with an intense solferino red eye. It is of medium height and of branching habit, which means a free bloomer.

Widar. Light red, somewhat shaded violet. Each flower has a distinct white centre, which tends toward making the flower truss exceptionally showy. A free-flowering, attractive variety, which should be in every collection of Phloxes.

Price of all Phlox, 25c. each; doz., \$2.50; \$15.00 per 100.

PHLOX SUFFRUTICOSA

These differ from the others in that the foliage and stem are deep green and glossy, and they begin to blossom in June and remain in bloom until October. These are listed in regular alphabetical order above, marked thus (Suffr.) after the name. Price of these varieties is 25c. each; doz., \$2.50; \$15.00 per 100.

MISCELLANEONS PHLOXES

Amoena. A beautiful plant, with soft rose-colored flowers; one of the best for rockery or borders; 4 inches high; April-May.

Divaricata Canadensis. A patch of these makes a spring show hard to describe. The large heads of fragrant lavender flowers appear the latter part of April and in May.

Divaricata Alba Grandiflora. A white-flowered form of the above.

Ovata Carolina (Mountain Phlox). A handsome evergreen species of dwarf habit, with masses of rosy pink flowers; 10-12 inches; May and June.

Subulata Rosea (Moss Pink). Moss evergreen-like foliage, tucking close to the ground and covered completely with pink star-like flowers in May.

Subulata Alba. The same as Rosea, with pure white flowers.

Price of any of the above Miscellaneous Phlox, 25c. each; doz., \$2.50; \$15.00 per 100.

MICHELL'S GIANT FLOWERING PAEONIES

Paeony Candidissima

No disease or insect ever troubles this plant. They delight in a sunny location in deep rich soil. After planting water regularly until you feel they are established and always take care to see that the crown or top of root is not more than 1 to 2 inches below the surface when covered. The roots are perfectly hardy and once planted remain for years, increasing in size. Roots can be delivered beginning in April or in the autumn beginning in September.

Hemerocallis (See Page 42)

TRITOMA (Flame Flower)

(Flame Flower, Torch Lily or Red Hot Poker Plant)

In summer and autumn when other flowers are on the wane, the Tritoma looms up and furnishes a wealth of bloom till killing frosts check it. Though the roots are considered hardy, we, however, recommend that they be lifted in the autumn and placed in a box of soil or sand, preferably in the cellar.

Pfitzeri. Blooms from August till October; rich orange scarlet. 25c. each; doz., \$2.50; \$15.00 per 100.

VERBASCUM

Rudbeckia Golden Glow

VERONICA (Speedwell)

A fairly numerous and much grown group of perennials which, with few exceptions, bear spikes of blue flowers. Excellent for cutting. June to August.

Amethystina. Amethyst blue flowers.

Incana. White, silvery-like foliage, pale blue flowers; 12 to 18 inches.

Longifolia. Subsessilis. Grows 2½ feet high; rich blue. 25c. each; doz., \$2.50.

Repens. Fine for rockeries or carpet bedding; light blue flowers; 6 inches.

Price of Veronica, except where noted, 25c. each; doz., \$2.50; \$15.00 per 100.

VINCA (Periwinkle or Myrtle)

It is often a perplexing problem to find the plant that will do well in a dense shade. Right there is where Vincas of the hardy class should be employed, also in lawn plantings under trees, in woodlands and on spots where it is desired to cover the ground and no grass will grow. The attractive light lavender flowers produce a sheen of color in May. It is valuable for planting on cemetery lots by reason of its dwarf creeping habit. The foliage is green all winter.

Minor. Green foliage, lavender flowers.

Extra strong plants, 25c. each; doz., \$2.50; \$15.00 per 100.

YUCCA (Adam's Needle)

This plant sets off to best advantage if placed as individual specimens either on the lawn or in the shrubby border. The foliage is of an evergreen nature, is slender and pointed, 4 to 5 feet, cream white, bell-shaped, flowers July and August.

Filamentosa. 35c. each; doz., \$3.50; \$25.00 per 100.

PLEASE NOTE.—In order to facilitate the packing of and so that the least shipping space practical is required, most large nurserymen, including ourselves, will cut back all shrubbery, hedge plants and small fruits prior to packing and shipping.

This trimming back will be practically the same as is usually done at the time of planting, so the stock when received by you need not be trimmed at planting time.

AMYGDALUS

(Flowering Almond)

Rubra Flore Pleno Nana. Erect, slender branches, which are covered in May with small, very double, fragrant, pink flowers. Strong plants 1½ to 2 feet. \$1.00 each; \$4.00 for 6; doz., \$7.50.

ALTHEA

(Rose of Sharon)

These thrive almost anywhere, producing their bloom from July till September.

Alba Plena. Pure white; double.

Atropurpurea Plena. Double purple.

Duchess de Brabant. Double; deep red.

Totus Albus. Single; pure white.

Plants, 2 to 3 feet high. 50c. each; doz., \$5.00; \$25.00 per 100.

AZALEAS

We have on hand from an importation received last spring a few choice plants in the following varieties:

Amoena. Dwarf bushy shrub; covered in April and May with purplish-red double flowers. The foliage remains all winter, when it takes on a coppery-red shade. 12-inch diameter heads. \$1.50 each.

Anthony Koster. A type of the Mollis variety, with exceptionally large flowers of a golden orange; flowering in May; plants with 12 to 15 in. heads. \$1.50 each.

Mollis. Of dwarf bush-like habit, with light green leaves. There are but three colors of it, yellow, orange and red; it blooms about the middle of May. Mixed colors. Plants, 12 to 15 buds. \$1.50 each.

J. C. Van Tol. A type of the Mollis variety, but much larger flowers, bright red, very attractive. \$1.50 each.

BERBERIS (Japanese Barberry)

Thunbergii. A good, hardy plant of low, dense growth for lawn or border. The slender branches are prickly with small thorns, and tend to make a defensive hedge that few animals will attempt to penetrate. In autumn the foliage is a bright crimson; when it falls, a profusion of scarlet berries, which remain throughout the winter, are revealed on the branches.

Doz. 100 1000

1 to 1½ feet (plant 8 to 10 inches apart) .. \$2.50 \$18.00 \$150.00

BUDDLEYA (Butterfly Bush)

Variabilis Magnifica. Flowers continuously all season. The flower racemes are composed of many little blossoms in the shape and color of lilacs. 3 inch pot plants, 30c. each; \$3.00 per doz.; \$20.00 per 100.

CALYCANTHUS (Sweet Shrub or All Spice)

Floridus. Chocolate-colored double flowers, with a peculiar agreeable odor. Blooms in June. 50c. each; doz., \$5.00.

CERASUS (Flowering Cherry)

Double White. Numerous white flowers conceal the branches in May; 4 to 5 feet. \$1.50 each.

Double Pink. Beautiful shade of pink; splendid for lawn decoration; 3 to 4 feet. \$1.75 each.

Shipping season is usually from October 15th to November 15th

CYTISUS (Golden Chain)

Laburnum. A large shrub with shining green leaves and long drooping racemes of yellow flowers, which appear in early summer; 3 to 4 ft. plants. 75c. each; doz., \$7.50.

CLETHRA (Sweet Pepper Bush)

Alnifolia. Of low and dense growth; has numerous spikes of small white fragrant flowers appearing in July; desirable for moist places or along water edges. 50c. each; doz., \$5.00.

CERCIS (Judas or Red Bush)

Canadensis. A tall slender growing shrub, developing eventually into a large tree. Very early in the spring the leafless branches are covered with delicate deep pink flowers; 2 to 3 foot plants. 75c. each; doz., \$7.50.

CHIONANTHUS (White Fringe)

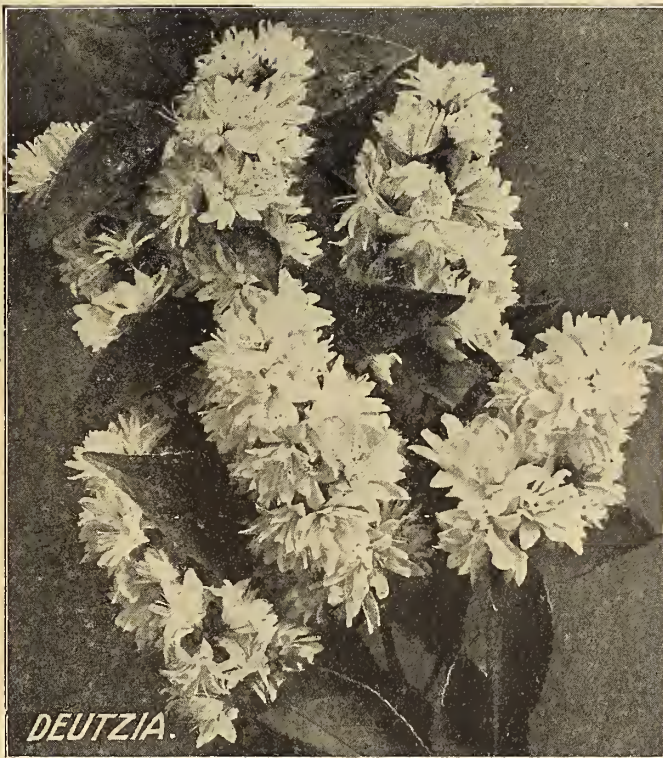

Virginica. In May and June the tree is covered with long, fluffy panicles of fine white bloom. Strong plants; 2 feet. 50c. each; doz., \$5.00.

CORNUS (Dogwood) (Bush Form)

This plant is so well known that it hardly needs description. The flowers appear before the foliage in May. In the autumn takes on a rich crimson shade.

Florida (White Flowered Dogwood). Strong plants; 2 to 3 ft. 75c. each; doz., \$7.50.

Rubra (Pink Flowered Dogwood). 2 to 3 ft. \$1.50 each.

DEUTZIA

DEUTZIA

The Deutzias are among the most useful of our summer flowering shrubs. For planting either individually or in masses they are very attractive. Can be used for cut flowers.

Candidissima (Fl. pl.). Abundant racemes of double, pure white flowers in June, luxuriant foliage and fine habit. 2 to 3 ft. plants.

Crenata Rosea (Fl. pl.). Double flowering white tinged pink. 2 to 3 ft.

Gracilis. Of dwarf, bushy habit. White flower. 18 to 24 inches. Price of the above. 50c. each; doz., \$5.00.

SPECIAL ATTENTION, PLEASE

The quality of our flowering shrubs is splendid; it must not be compared with small 1-year-old plants. What we offer will usually give an effect the first year after planting and is well worth any difference in cost over the smaller plants.

SHRUBS should be sent by express wherever possible.

Trees, Plants and Shrubs travel best by express. None can be sent C. O. D.

(hb)

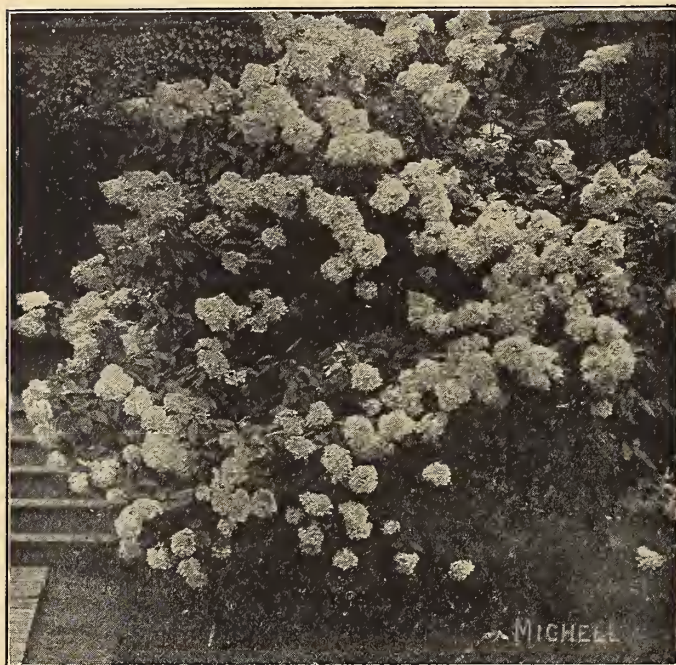

EUONYMUS

Japonica Aurea Var. Beautiful deep green and yellow margined foliage, a splendid evergreen. 12 to 15 inch plants. \$1.25 each; doz., \$12.50.

FORSYTHIA (Golden Bells)

Bright golden yellow, star-shaped flowers burst into bloom just as winter is leaving and while the bush is otherwise bare. In fact, when in flower, nothing else but bloom can be seen.

Fortunei. Erect growing with dark green foliage; strong plants. 3 to 4 ft. 50c. each; doz., \$5.00.

Hydrangea Paniculata Grandiflora

HYDRANGEA

Arborescens Grandiflora Alba (Snowball Hydrangea). The snow-white blooms are of the largest size. Coming into flower early in June and lasting until late August. Is more hardy than any other sorts and especially suited to plant in shaded places. 2 ft., 50c. each; \$5.00 doz.

Paniculata Grandiflora. The large panicles of white flowers are at their best during August; later they take on a reddish cast. These plants look fine used as single specimens on the lawn or grouped in large beds. Strong bush form 2 to 3 ft. plants, 50c. each; per doz., \$5.00. Extra strong stock, 3 to 4 ft., 75c. each; per doz., \$7.50.

Paniculata Grandiflora (Standard or Tree Shaped). These are fine, planted as individual specimens in the lawn or in the center of beds, containing other plants. Stems, 2 to 2½ feet long with shapely heads. \$1.50 each.

HYDRANGEA

(Otaksa and French Varieties) (See page 36)

KERRIA (Globe Flower or Corchorus)

Shrubs with light green branches. Does well in any soil, in shaded or open locations, flowering in May and June.

Double-flowered. Of medium size; double yellow flowers. Plants, 2 to 3 feet high. 50c. each; per doz., \$5.00.

LONICERA (Honeysuckle)

Morrowi (Japanese Bush Honeysuckle). An open bush with irregular branches. The foliage is dark green with small white flowers, which appear during May. During the late summer and early autumn the plant is covered with bright red berries. Plants, 2 to 3 feet. 50c. each; doz., \$5.00.

**LILACS**

Vulgaris. Common purple, sweet-scented lilac. 18 to 30 inches high. 50c. each; doz., \$5.00.

Vulgaris Alba. Pure white type of the above, but more fragrant. 18 to 30 inches high. 50c. each; doz., \$5.00.

White Persian. Very early flowering; pure white, sweet scented. 18 to 24 inches high. 50c. each; doz., \$5.00.

Persian. Early purple flowering; very profuse. 18 to 24 inches high. 50c. each; doz., \$5.00.

PHILADELPHUS (Mock Orange or Orange Blossoms)

A shrub that can always be depended upon to give splendid satisfaction. No insects bother it, and in May and June the bushes are literally covered with flowers.

Coronarius. Handsome foliage and beautiful white flowers, quite fragrant. Plants, 2 to 3 feet. 50c. each; doz., \$5.00.

PRUNUS

Pissardi (Purple-leaved Plum). A tree-like shrub with dark purple leaves that keep their lustrous colored foliage right up till frost, having small pinkish white flowers in early spring. Plants, 2 to 3 feet. 75c. each; doz., \$7.50.

PYRUS

Japonicus (Japan Quince). This shrub is a beautiful sight, when covered in the early spring with cherry-red flowers about the size of an apple blossom. After the flowers fall, many of them set fruit, which is edible, making the finest Quince Jelly for preserves. This plant can also be used for hedge effects, and on account of the thorny nature it is a good barrier against cats, dogs and other animals. Extra strong plants, 2½ ft. 60c. each; doz., \$6.00.

SPECIAL NOTICE ON GUARANTEE

We spare no effort to supply trees, plants and shrubs of the best quality in first-class living condition. On account of the many causes beyond our control we regret we cannot guarantee this stock to live and establish itself, as that is usually entirely within the power of the buyer or planter. If customers desire us to guarantee trees, plants and shrubs to live we will assume such guarantee at an advance of 25 per cent. over and above our usual prices, but not otherwise, and such guarantee will expire within 90 days from date of shipping.

RHODODENDRONS

From an importation received last spring we have to offer a splendid lot of plants in mixed colors, though named varieties we cannot distinguish them, the importation of these until further notice has been forbidden, so that when the present stock is exhausted, it is doubtful when it can be replenished. Strong plants 18 to 24 inches high, \$2.50 each.

SPIREA

This group embraces a wide variety, so much so that frequently one might suppose that the plants belong to a different family, from which it can be seen that a collection of them will make an effective variety.

Anthony Waterer. Of dwarf, dense habit, bearing a profusion of crimson flowers. 18 to 24 inches, 50c. each; per doz., \$5.00.

Prunifolia (Bridal Wreath). The pretty double white flowers are all along the almost leafless stem about May 1st just as the leaves are budding. Splendid plants, 3 feet, 50c. each; per doz., \$5.00.

SYMPHORICARPUS

Racemosus (Snowberry). Small red flowers are succeeded by many white berries, remaining on the plant through half the winter; strong plants, 2 ft. 50c. each; doz., \$5.00.

VIBURNUM

Carlesi. A new Japanese variety of a compact bushy habit, bearing sweet-scented white flowers, somewhat after the style of a *Bouvardia*. This is a splendid addition to the *Viburnums* on account of its great beauty and its exquisite odor. 75c. each; doz., \$8.00.

Plicatum (Japanese Snowball). A desirable shrub. Should be in every garden or on the lawn; perfectly hardy, blooming in June. *Extra fine plants*, 2 to 3 feet. 50c. each; doz., \$5.00.

Viburnum Opulus Sterilis (Guelder Rose or Snowball). Of spreading habit, bearing flat clusters of single white flowers, which afterwards produce brilliant red berries, which hang to the plant all winter; very decorative. Strong plants, 3 feet. 50c. each; doz., \$5.00.

WEIGELIA

Amabilis. A pink flowering variety, in bloom during June and July; extra strong plants 2 to 3 feet. 50c. each; doz., \$5.00.

Candida. Flowers abundantly in June and July, additional bloom is also shown during the autumn months. The tube-shaped flowers are pure white; fine for cutting. Plants, 2 to 3 feet. 50c. each; doz., \$5.00.

Eva Rathke. Of erect form and vigorous habit. The deep carmine-red flowers are the best of the red-flowering sorts, 2 to 3 ft. 50c. each; doz., \$5.00.

HARDY CLIMBING VINES

The quality of the climbers offered by us is exceptional, the plants being pot grown and very large, and easily worth more than the price asked.

BERBERIS THUNBERGII

(Japanese Barberry)

A good hardy plant of low dense growth. There is an air of grace and refinement to the Barberry Bush, which is not embodied in any other hedge plant. It is a brilliant light green from early spring to winter. It has a manner of growth which does not give it the stiff, cold appearance which many other hedge plants have. It should really be regarded as a shrub, as it can be planted individually in lawn or border. The slender branches are prickly with small thorns, and tend to make a defensive hedge that few animals will attempt to penetrate. In autumn the foliage is a bright crimson; when it falls a profusion of scarlet berries, which remain throughout the winter, are revealed on the branches.

GOLDEN OR VARIEGATED LEAVED PRIVET

Like the California variety, but each leaf is margined and blotched golden yellow, giving it, from a distance, a striking appearance. It is quite new and the stock is limited, when available it will become very popular. We recommend it especially for placing among shrubbery or for planting on the lawn; the contrast between the grass and golden foliage is beautiful.

Bushy Plants, 15 to 18 in. high, \$1.00 each; doz., \$10.

A Hedge of Berberis Thunbergii—Nothing in the Hedge Plant Line Equals it for Grace and Beauty

A Privet Hedge is Much More Attractive than the Best Fence

CALIFORNIA PRIVET

Unlike a fence which needs painting, repairing, etc., and then never looks well. This hedge is no further expense after planted, and it adds dignity and charm to any home, and increases the value of real estate. Being absolutely hardy, it increases in its beauty with each successive year. Privet is somewhat of an Evergreen nature and looks attractive until real winter sets in. Plants should be set 12 inches apart in double rows, in zig-zag fashion, so that the plants are diagonally opposite each other; this practically places them 6 inches apart, which is desirable to get a quick dense growth. Plant from October 20th till the ground freezes and from March 15th to May 15th.

NOTE.—Our privet is especially fine and will give splendid satisfaction.

PLEASE NOTE.—All privet offered are of the height specified before shipping, but to save space in packing and transportation all Privet will be shipped cut back to 18 inches. It is advisable to trim it after planting in any event to this height if not lower.

(hb)

- Beech (Purple)** *F. sylvatica purpurea*. The foliage in spring is a deep purple, changing later to green. Should be closely pruned when transplanted. 4 to 5 feet, \$3.75; 5 to 6 feet, \$6.00.
- Beech (Purple Rivers)** *F. sylvatica Riversii*. Where a large-growing tree with purple foliage is wanted, nothing equals this. The leaves are always a rich shade, sometimes crimson and sometimes almost black. 4 to 5 feet, \$4.00; 6 to 8 feet, \$7.50.
- Beech (Weeping)** (*Fagus sylvatica pendula*). Irregular in outline, and has a picturesque beauty peculiar to itself. Its twisted and contorted branches resemble living fountains of foliage. 4 to 5 feet, \$6.50; 8 to 10 feet, \$12.00.
- Birch (Cut-Leaved Weeping)** *Betula alba laciniata pendula*. Tall, slender, with graceful drooping branches, silvery-white bark and delicately cut foliage. 8 to 10 feet, \$3.75; 10 to 12 feet, \$5.50.
- Birch (Young's Weeping)** *B. Youngi pendula*. Droops gracefully to the ground in fine, thread-like shoots. One of the most beautiful of the Weeping Birches. 4 to 5 feet, \$5.50; 5 to 6 feet, \$8.00.
- Dogwood (Red Flowering)** *Cornus florida rubra* (Tree Form). The flowers which appear early in May before the leaves, are of a deep rosy-pink color, producing a perfect drift of bloom. Foliage large, velvety, dark green in summer and brilliant crimson in fall. 2 to 3 feet, \$3.00; 3 to 4 feet, \$4.00.
- Dogwood (White Flowering)** *C. florida alba* (Tree Form). Similar to the red-flowering in habit of growth, though attaining larger proportions. A mass of conspicuous white flowers in spring. 4 to 5 feet, \$2.50; 5 to 6 feet, \$3.00.
- Elm (American)** *Ulmus Americana*. One of the finest street shade trees in the world. 8 to 10 feet, \$3.50; 10 to 12 feet, \$4.50.
- Horse Chestnut** (*Aesculus hippocastanum*). The flowers are large, white, spotted with purple and produced in large, compact spikes. A fine shade tree. 8 to 10 feet, \$3.50; 10 to 12 feet, \$5.00.
- Larch (European)** *Larix decidua*. A conifer with deciduous needle-like leaves; bright green very early in spring, and clear yellow in autumn. 4 to 6 feet, \$3.50.
- Linden (American)** *T. Americana* (Basswood). The largest-growing Linden. Suitable for parks or streets. When in blossom, its yellow flowers are intensely fragrant. 8 to 10 feet, \$4.50; 10 to 12 feet, \$5.50.
- Linden (European)** *Tilia Europaea*. Leaves smaller and darker than those of the American Linden, forming a dense shade. 8 to 10 feet, \$4.50; 10 to 12 feet, \$6.00.
- Magnolia Conspicua**. In habit of growth similar to *Soulangeana*, large, pure white flowers, which are produced in great abundance. 2 to 3 feet, \$5.00; 3 to 4 feet, \$6.00.
- Magnolia Soulangeana**. A low spreading tree, covered early in the spring before the leaves appear with large flowers, purple at the base and white in the upper half of the petals. 3 to 4 feet, \$3.00; 4 to 5 feet, \$6.00.
- Maple (Silver)** *Acer dasycarpum*. Of rapid growth; extensively planted for ornament and shade. 10 to 12 feet, \$3.50; 12 to 14 feet, \$5.50.
- Maple (Japanese)** *A. palmatum Atropurpureum*. The Japan Maple is unsurpassed for ornamental purposes, the blood-red foliage making it strikingly handsome. Trees are dwarf in habit, seldom attaining a height of more than a few feet. 2 feet, \$2.00; 3 feet, \$3.50.
- Maple (Norway)** *A. Platanoides*. One of the finest park, street, shade or lawn trees in America; of rounded form, compact habit, stout, vigorous growth. 8 to 10 feet, \$3.50; 10 to 12 feet, \$4.50; 12 to 14 feet, \$6.50.
- Maple (Sugar)** *A. saccharum*. Its upright habit of growth, dense shade and adaptability to different soils have rendered it one of the most extensively used. The autumn effect of the foliage is particularly handsome. 10 to 12 feet, \$4.00; 12 to 14 feet, \$6.50.
- Mountain Ash** (*Sorbus Aucuparia*). A handsome native tree. In autumn and early winter the tree is clothed with large clusters of red berries. 8 to 10 feet, \$4.50.
- Mulberry (Teas' Weeping)** *Morus alba pendula*. Forms a perfect umbrella-shaped head, with slender, willowy branches, drooping to the ground. 2-year heads, \$4.00; large specimens, \$6.00.
- Oak (Scarlet)** *Quercus coccinea*. A large, well-shaped tree; in the fall the foliage changes to a brilliant scarlet. 7 to 8 feet, \$4.00; 8 to 10 feet, \$5.00.
- Oak (Pin)** *Q. palustris*. Foliage deep green and finely divided. The leaves become a shade of scarlet and yellow in autumn. It thrives in almost any soil. 8 to 10 feet, \$4.50; 10 to 12 feet, \$5.50; 12 to 14 feet, \$8.00.

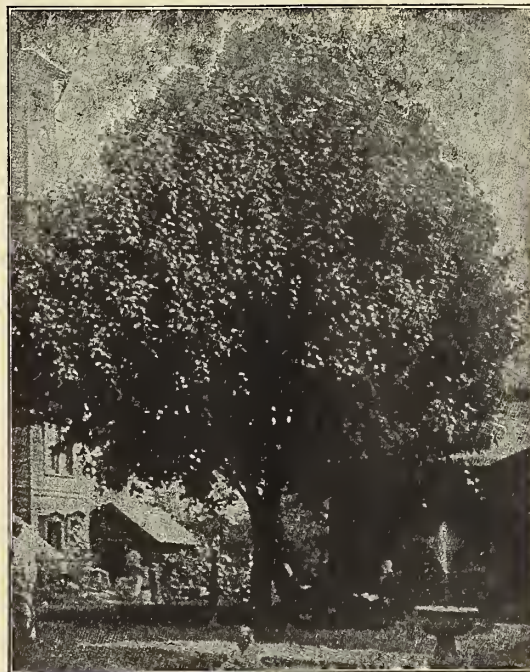

Catalpa (see *Umbrella Tree*)

We can also supply a complete line of Evergreens. Ask for list and prices.

SPECIAL NOTICE ON GUARANTEE

We spare no effort to supply trees, plants and shrubs of the best quality in first-class living condition. On account of the many causes beyond our control we regret we cannot guarantee this stock to live and establish itself, as that is usually entirely within the power of the buyer or planter. If customers desire us to guarantee trees, plants and shrubs to live we will assume such guarantee at an advance of 25 per cent. over and above our usual prices, but not otherwise, and such guarantee will expire within 90 days from date of shipping.

Norway Maple

- Plane (Oriental)** *Platanus orientalis* (Buttonwood). A favorite tree for avenue and seashore planting, of large spreading habit and rapid growth; not affected by insects. Leaves large, smooth and handsome, affording abundant shade. 8 to 10 feet, \$3.50; 10 to 12 feet, \$4.50; 12 to 14 feet, \$5.50.
- Poplar (Carolina)** *Populus monilifera*. Good in almost any location. 10 to 12 feet, \$3.50.
- Poplar (Lombardy)** *P. nigra fastigiata* var. *Italica*. Its tall form, sometimes reaching 120 feet, makes it indispensable in landscape effects for breaking monotony of outline. 8 to 10 feet, \$3.50; 10 to 12 feet, \$4.00; 14 to 16 feet, \$4.50.
- Pyrus** (Bechtel's Double-flowering Crab). The tree is of medium growth, and the flowers of immense size, of a beautiful pink color, are highly fragrant. Very double. 2 to 3 feet, \$3.50; 3 to 4 feet, \$4.00.
- Salisbury** (Maiden Hair Tree). One of the oddest and most peculiar of all hardy exotic trees. Its leaves are deciduous, fan-shaped, broad and notched, resembling those of the Maiden Hair Fern. 6 to 8 feet, \$3.50; 8 to 10 feet, \$4.50.
- Sweet Gum** (*Liquidambar styraciflua*). A rapid-growing tree, thriving in a great variety of soils. The leaves are roundish, but with five to seven pointed spreading lobes. In autumn they assume a rich bronze and crimson. 6 to 8 feet, \$3.50; 8 to 10 feet, \$4.50.
- Tulip Tree** (*Liriodendron tulipifera*). A popular native deciduous tree, sometimes attaining a height of seventy-five to one hundred feet. 6 to 8 feet, \$2.50; 10 to 12 feet, \$5.00.
- Umbrella Tree** (*Catalpa Bungei*). For the lawn the *Catalpa Bungei* is very effective. Has a dense, perfect, half-globular or umbrella-shaped head, high on a straight upright stem. On the terraces when used in connection with the California Privet hedge the effect is most pleasing. Price, 6 to 7 feet stems, 1-year heads, \$3.00 each; 6 to 7 feet stems, 4-year heads, \$7.50 each.
- Weeping Willow** (*Salix Babylonica*). This is the well-known Weeping Willow, whose long pendulous branches droop so gracefully, and sway to the lightest breeze. Grows well in wet or dry places. 8 to 10 feet, \$3.50; 10 to 12 feet, \$4.50.

Every garden should have some space reserved for small fruits. None bought in the market can compare with those picked fresh by yourself when you want them. Any surplus that cannot be consumed may be put up for winter use.

SPECIAL NOTICE

In order to save time and shipping space, in the future before shipping we will trim back all vines and bushes of small fruits unless expressly ordered otherwise. The plants invariably should be trimmed back before being planted, so customers will know we have done this; when they receive the plants they are ready to plant out and water.

BLACKBERRIES (Extra Strong Plants)

Blackberries thrive most anywhere. The plants are subject at times to attacks of rust, particularly during prolonged wet spells in summer. A spraying, especially underneath the foliage, with copper solution, usually arrests this. However, if the disease spreads too much, it is best to dig up the bushes, burn them and plant new ones in another part of the garden. If they are sprayed before being affected it is the best plan.

Eldorado. A very vigorous grower, free from mildew or rust, enormously productive; fruit large, excellent quality, without core.

Mesereau. Remarkably strong grower. An enormous producer of extra size berries which are brilliant black and retain their color under all conditions; very sweet, without core. Unsurpassed as a shipper and keeper.

Price of Blackberries, \$1.00 doz.; \$6.00 per 100.

Note.—If Blackberries are desired by Parcel Post allow 15c. per dozen for postage, as we send out only extra strong plants which generally bear some the first season.

CURRANTS (Extra Strong Plants)

Currants like good, rich soil. They are particularly susceptible to scale, and steps should be taken to keep them free from this by liberal spraying, when the bushes are dormant.

Black Naples. Fruit varies from small to large, averaging medium; strong flavor. An old and well-known variety which makes splendid jelly; the flavor is very distinct and preferred by many.

Red Dutch. An old and well-known standard variety; clusters average about three inches long; berries medium in size, dark red.

Price.—Any of the above varieties of Currants, strong 2-year-old, 20c. each; per doz., \$2.00; \$15.00 per 100.

Note.—If Currants are desired by Parcel Post, add 20c. per doz. for postage, as we send out extra strong bushes.

GOOSEBERRIES (Extra Strong Plants)

Gooseberries should be cultivated during the growing season and fertilized with manure in the early spring or late fall. They will repay you for this trouble with an extra big crop.

Downing. Fruit medium to large, whitish green; flesh soft, juicy.

Red Jacket. Of American origin, possessing all the good qualities of the English type, and withstanding our severe climatic conditions with impunity. A wonderful cropper, with clean healthy foliage.

Price of Gooseberries, 25c. each; doz., \$2.50; \$15.00 per 100.

Note.—If Gooseberries are wanted by Parcel Post, please add 25c. per doz. for mailing charges.

PLEASE NOTE.—Some States forbid the shipment of Gooseberries into their boundary. In ordering it might be well to know if there is such a law in your State.

SPECIAL NOTICE ON GUARANTEE

We spare no efforts to supply "small fruit" bushes of the best quality in first-class living condition. On account of the many causes beyond our control we regret we cannot guarantee this stock to live and establish itself, as that is usually entirely within the power of the buyer or planter. If customers desire us to guarantee these and trees and shrubs to live we will assume such guarantee at an advance of 25 per cent. over and above our usual prices, but not otherwise, and such guarantee will expire within 90 days from date of shipping.

NOTE.—Owing to the peculiar laws of Florida concerning the shipping of nursery stock into that State, we regret **WE ARE UNABLE TO ACCEPT ORDERS FOR NURSERY STOCK OR SMALL FRUITS FOR SHIPMENT WITHIN THE STATE OF FLORIDA.**

GRAPE VINES

A few of these planted in the garden after several years will yield abundant crops, and they last for years with little attention except pruning and spraying.

Caco. The most delicious of all Grapes—perfectly hardy, has been pronounced by America's most expert grape growers to equal in high quality and melting texture the finest varieties grown under glass. When one considers the price of the greenhouse product and realizes that the wonderful Caco can be grown in the back yard, almost without attention, the force of the above statement is apparent. The large berry is wine-red. Bunch of good size, compact and of good form. Ripens in ten days to two weeks in advance of Concord; rich in sugar, excellent in flavor. Vine is a very strong, vigorous grower, healthy and prolific. This is a very fine variety and is easily worth the slight advance in price over the older varieties. 50c. each; doz., \$5.00.

Campbell's Early. A valuable and delicious grape; vine very strong, hardy and vigorous, with thick, healthy foliage; berries large, black, with light purplish bloom; skin thin; few and small seeds; flavor rich, delicious.

Catawba. Delicious flavor, medium size red berry.

Concord. The well-known standard purple variety, succeeds wherever grapes grow.

Moore's Diamond. A strong healthy grower, hardy and productive; color, white; berries large, flesh tender, juicy, but with little pulp; ripens before Concord.

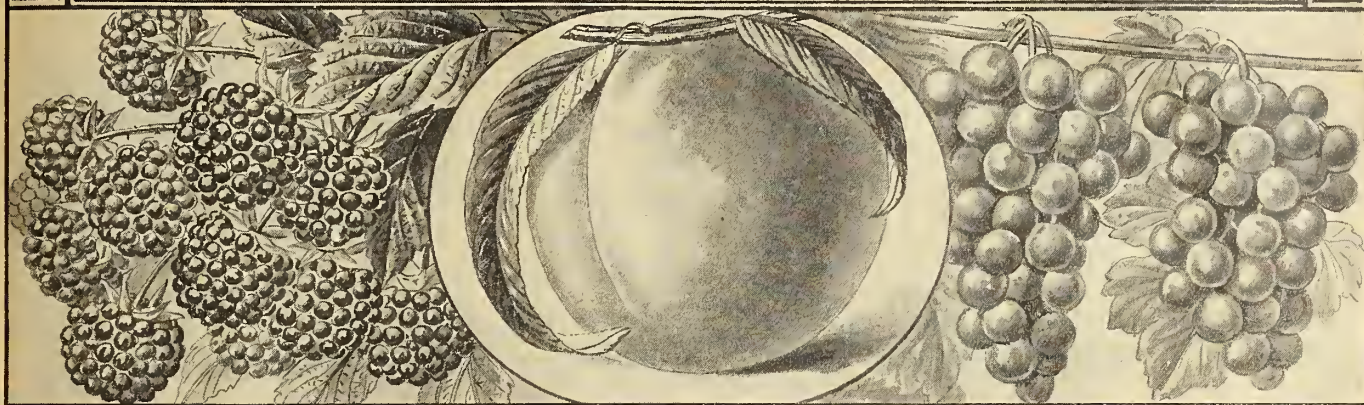

Niagara. An unusually strong grower; bunches very large and compact; berries large, light greenish-white, semi-transparent, has very little pulp and is sweet to the centre.

Prices—2-year-old vines (except the Caco Variety), 35c. each; doz., \$3.50; \$22.00 per 100. If Grape Vines are wanted by mail, add 5c. each for postage charges.

Please Note.—We have reduced the variety of Grape Vines offered, retaining the best in varieties which cover the different colors.

Shipping Seasons for small fruits are from October 20th till freezing.

MICHELL'S SELECT FRUITS, ETC.

RASPBERRIES (Extra Strong Plants)

Raspberries should be carefully staked, to get large crops. We also recommend that well-rotted manure or other suitable fertilizer be dug around the bushes, either in the fall or early spring.

Cumberland (Blackcap). The largest raspberry known. Selected specimens measure an inch in diameter, immensely productive.

Cuthbert. Berries very large, measuring 3 inches around; conical; rich crimson; one of the old-time favorites.

Golden Queen. Berries are large, of beautiful bright yellow, of excellent quality; medium to late; very sweet.

Price of any of the above Raspberry Plants (except where noted): \$1.00 per doz.; \$6.00 per 100. If raspberries are wanted by parcel post, add 15c. per dozen for charges.

EVERBEARING RASPBERRY "RANERE"

This yields its first crop of berries in June (the regular season), and yields an equally heavy crop the latter part of August and continues bearing right up to November.

It thrives equally well on sandy and heavy soil. The fruit is large, of a beautiful crimson color, very sweet and juicy and is borne in great abundance, and does not seem to sunscald as easily as other sorts. A photo was made of a stalk which had by actual count 169 berries on one stem. This will give some idea of its free fruiting qualities.

We send out strong plants, which, from our experience in the past, should bear the first season.

Price, \$1.00 per doz.; per 100, \$6.00.

If wanted by mail, add 15c. per doz. for postage.

STRAWBERRY PLANTS

MID-SEASON VARIETIES

Bubach, Big Joe, Heritage, Rewastico.

LATE SEASON VARIETIES

First Quality, Brandywine, Gandy, Glen Mary, Stevens' Late Champion.

FALL FRUITING VARIETIES

"Peerless" (New). This variety is claimed to be the best fall bearing sort, producing right up to heavy frosts, as the fruit is protected by the large, vigorous foliage.

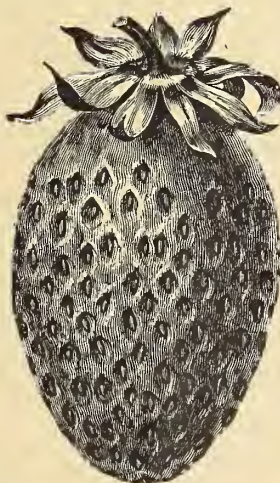

Progressive and Superb.

These are two of the best of the American varieties.

Price of pot-grown, \$1.00 per doz.; \$6.00 per 100; \$50.00 per 1000.

If Layer Strawberry Plants are wanted by mail, add 5c. per doz. and 15c. per 100 for mailing charges.

Layer Strawberry Plants ready about October 15th. Price of any of the above: 40c. doz.; per 100, \$2.00; \$15.00 per 1000.

PRAIRIE STATE INCUBATORS

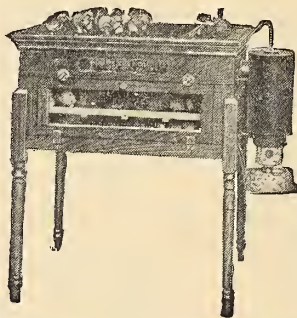

In the building, design and construction of the Prairie State Incubator every known factor to the present time has been taken into consideration. All Prairie State Incubators, except the Keystone styles, are equipped with nurseries.

In shipping, the heaters are crated separately, as their design and size make it more practical; also it does away with the possibility of the heater becoming injured in transit.

There are also many other improvements in the Prairie State Incubator that a study of the Prairie State Catalog and a close inspection of the machine itself, if possible, will best reveal.

Prairie State Heaters, built in four sizes, are of absolutely new design and all comply with the most rigid requirements of the National Board of Fire Underwriters.

Every heater is inspected by the regular authorized Underwriters' inspector, under the direction of the Fire Underwriters' Laboratories, and bears the inspection mark together with the Under-

writers' Label, which facts, in combination with the construction of the incubator, make the entire machine insurable in any location without any extra insurance rate.

The Prairie State has the diffusive air circulation system and sand tray moisture feature and is as faultless as it is possible to make incubators.

MICHELL'S RUSTIC AND ORNAMENTAL BIRD HOUSES

Comparatively few of us recognize the great economic value of birds. Particularly the bluebirds, house wrens and martins are very easily domesticated. Their favorite nesting sites are bird houses made for their use which may be placed about in the garden, on the farm or in orchards. As rent, these grateful birds pay amply, by destroying millions of insects annually. If you put up your bird houses in the autumn or before the birds arrive in the spring, you may be able to keep the birds with you all winter if you provide them with shelter and food.

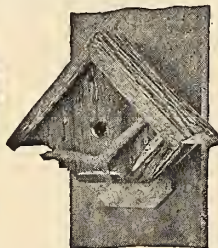

ABOUT WRENS. Place Wren Houses near your dwellings; the wren is hardly ever known to nest off in the woods. If not disturbed, they will become very tame. Wren Houses are made with 1-inch holes so that sparrows cannot disturb the occupants.
